

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Second International Handbook on Globalisation, Education and Policy Research Joseph Zajda, 2015-01-06 This handbook presents a global overview of developments in education and policy change during the last decade. It provides an accessible practical and comparative source of current research that examines the intersecting and diverse discourses of this important issue. Divided into two parts, the handbook first examines globalisation and education policy reforms, including coverage of main trends as well as specific policy issues such as gender equity, minorities, and human rights. Next, the handbook offers a comparative perspective that evaluates the ambivalent and problematic relationship between globalisation, the state, and education reforms globally. It features coverage on curricula issues and education reforms in schools around the world, as well as the curriculum in the global culture. Now more than ever, there is a need to understand and analyse both the intended and the unintended effects of globalisation on economic competitiveness, educational systems, the state, and relevant policy changes, all as they affect individuals, the higher education sector, schools, policy makers, and powerful corporate organisations across the globe. By examining some of the major education policy issues, particularly in the light of recent shifts in education and policy research, this handbook offers readers a comprehensive picture of the impact of globalisation on education policy and reforms. It will serve as a vital sourcebook of ideas for researchers, practitioners, and policy makers in education.

Critical Mineral Resources of the United States K. J. Schulz, John H. DeYoung, Robert R. Seal, Dwight C. Bradley, 2017 As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities. Mineral commodities that have important uses and face potential supply disruption are critical to American economic and national security. However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may be critical today, and one considered critical today may not be so in the future. The U.S. Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security. For each mineral commodity covered, the authors provide a comprehensive look at: 1) the commodity's use; 2) the geology and global distribution of the mineral deposit types that account for the present and possible future supply of the commodity; 3) the current status of production, reserves, and resources in the United States and globally; and 4) environmental considerations related to the commodity's production from different types of mineral deposits. The volume describes U.S. critical mineral resources in a global context, for no country can be self-sufficient for all its mineral commodity needs, and the United States will always rely on global mineral commodity supply chains. This volume provides the scientific understanding of critical mineral resources required for informed decisionmaking by those responsible for ensuring that the United States has a secure and sustainable supply of mineral commodities.

Assessing Contexts of Learning Susanne Kuger, Eckhard

Klieme, Nina Jude, David Kaplan, 2016-12-05 This volume brings together educational effectiveness research and international large scale assessments demonstrating how the two fields can be applied to inspire and improve each other and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries The book's initial chapters introduce and summarize recent discussions and developments in the conceptualization implementation and evaluation of international large scale context assessments and provide an outlook on possible future developments Subsequently three thematic sections Student Background Outcomes of Education Beyond Achievement and Learning in Schools each present a series of chapters that provide the conceptual background for a wide range of important topics in education research policy and practice Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments other cross cultural research or national studies Using the example of one particular survey the Programme for International Student Assessment PISA 2015 this volume links all theoretical considerations to fully developed questionnaire material that was field tested and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools The primary purposes of this book are to inform readers about how education effectiveness research and international large scale assessments are already interacting to inform research and policymaking to identify areas where a closer collaboration of both fields or input from other areas could further improve this work to provide sound theoretical frameworks for future work in both fields and finally to relate these theoretical debates to currently available and evaluated material for future context assessments

Extractive Imperialism in the Americas James Petras, Henry Veltmeyer, 2014-07-24 Recent changes in the global economy which include a growing demand for energy and natural resources such as industrial minerals and agro food products have brought about a massive devastating pillage of resources in the developing world by multinational corporations as well as states with energy and food security concerns and concerns about a system global capitalism in the throes of a global crisis These developments have also brought about a major change in the form taken by imperialism actions taken by the state to advance the interests of the dominant capitalist class This book explores the changing face of US imperialism in the regional context of the Americas a major stage in the unfolding drama of a system in crisis

Social Studies Education in East Asian Contexts Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young

people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies **The American Steam**

Locomotive in the Twentieth Century Tom Morrison, 2018-07-24 Between 1900 and 1950 Americans built the most powerful steam locomotives of all time enormous engines that powered a colossal industry They were deceptively simple machines yet the more their technology was studied the more obscure it became Despite immense and sustained engineering efforts steam locomotives remained grossly inefficient in their use of increasingly costly fuel and labor In the end they baffled their masters and as soon as diesel electric technology provided an alternative steam locomotives disappeared from American railroads Drawing on the work of eminent engineers and railroad managers of the day this lavishly illustrated history chronicles the challenges triumphs and failures of American steam locomotive development and operation **United**
