*OGC - SSADM Foundation: Business Systems Development Series with SSADM*, **Requirements Analysis** David C. Hay, 2003 Thousands of software projects are doomed because they are based on a faulty understanding of the business problem that needs to be solved Requirements Analysis From Business Views to Architecture is the solution David C Hay brings together the world's best requirements analysis practices from two key viewpoints system development life cycle and architectural framework Hay teaches you the complete process of defining an architecture from a full understanding of what business people need to the creation of a complete enterprise architecture *The Software Life Cycle* Darrel Ince, Derek Andrews, 2014-05-20 The Software Life Cycle deals with the software lifecycle that is what exactly happens when software is developed Topics covered include aspects of software engineering structured techniques of software development and software project management The use of mathematics to design and develop computer systems is also discussed This book is comprised of 20 chapters divided into four sections and begins with an overview of software engineering and software development paying particular attention to the birth of software engineering and the introduction of formal methods of software development The next section explores some aspects of software engineering that tend to get ignored in the literature including functional programming functional programming languages and relational databases The reader is then introduced to structured methods of software development along with software project management The final chapter is devoted to software testing which can be functional or nonfunctional This monograph will be useful to software engineers and designers **Data Model Patterns: A Metadata Map** David C. Hay, 2010-07-20 Data Model Patterns A Metadata Map not only presents a conceptual model of a metadata repository but also demonstrates a true enterprise data model of the information technology industry itself It provides a step by step description of the model and is organized so that different readers can benefit from different parts It offers a view of the world being addressed by all the techniques methods and tools of the information processing industry for example object oriented design CASE business process re engineering etc and presents several concepts that need to be addressed by such tools This book is pertinent with companies and government agencies realizing that the data they use represent a significant corporate resource recognize the need to integrate data that has traditionally only been available from disparate sources An important component of this integration is management of the metadata that describe catalogue and provide access to the various forms of underlying business data The metadata repository is essential to keep track of the various physical components of these systems and their semantics The book is ideal for data management professionals data modeling and design professionals and data warehouse and database repository designers A comprehensive work based on the Zachman Framework for information architecture encompassing the Business Owner's Architect's and Designer's views for all columns data activities locations people timing and motivation Provides a step by step description of model and is organized so that different readers can benefit from different parts
