Loma 307 Material:

Archaeology And Geographic Information Systems Gary R Lock,Zoran Stancic,2022-03-26 Geographic information systems GIS applications are viewed with increasing interest by the archaeology community and this book with its diversity of topics and authorship should be a useful resource Complementing the volume *Interpreting Space* Taylor It is apparent that there are fundamental differences between North American and European archaeological uses of GIS Primarily these differences lie in the types of evidence for past landscapes that are available for study in the two continents and secondly in the different approaches to archaeology and specifically the theory and practice of landscape archaeology This title centres on the role of archaeological theory in cultural resource management CRM and in GIS applications generally It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology and particularly European archaeology Archaeology and GIS includes material on such concerns as CRM applications landscape archaeology intra site applications and explicitly theoretical concerns thus representing the state of GIS applications in European archaeology Contributions come from countries such as France Italy Hungary UK USA the Netherlands the Czech Republic Spain Slovenia and Finland Steel Fibre Reinforced Concrete Xavier Destrée,2025-04-25 Steel fiber reinforced concrete SFRC for structures dates back to 1925 yet it remains largely unknown to many engineers and contractors Essential information is often buried in codes reports and standards This book presents the essential information required by engineers to utilize SFRC effectively achieving superior results across a range of applications The focus is on its most common use in flat horizontal cast in situ applications such as ground bearing slabs ground suspended slabs suspended elevated slabs and raft slab foundations for buildings which present more opportunities than three dimensional structures Prefabrication and paving are discussed where they intersect with these main applications Material and structural testing are addressed to guide the design for these typical applications with attention also given to shrinkage cracking fire resistance of slabs and walls and environmental benefits alongside future opportunities and challenges This unique book provides simple practical guidance for designing and placing SFRC It is especially helpful for design and build contractors and professional engineers It offers simple tools and methods to launch a project **Loma, a Citizen of Venus** William Windsor,1897 **Business and Financial Concepts for Insurance Professionals** Lisa M.
