

LIVING ENVIRONMENT REVIEW

TOPIC 1: SIMILARITIES AND DIFFERENCES AMONG LIVING THINGS (Standard 4: Key Idea 1)

1. Which two organ systems provide materials required for the human body to produce ATP?

- (1) reproductive and excretory
- (2) digestive and respiratory
- (3) respiratory and immune
- (4) digestive and reproductive

2. Some human body cells are shown in the diagrams below:

Cells from skin

Blood cells

Cells from lining of bladder

Cells from lining of trachea

These groups of cells represent different

- (1) tissues in which similar cells function together
- (2) organs that help to carry out a specific life activity
- (3) systems that are responsible for a specific life activity
- (4) organelles that carry out different functions

3. Plants in areas with short growing seasons often have more chloroplasts in their cells than plants in areas with longer growing seasons. Compared to plants in areas with longer growing seasons, plants in areas with shorter growing seasons most likely

- (1) make and store food more quickly
- (2) have a higher rate of protein metabolism
- (3) grow taller
- (4) have a different method of respiration

4. An established ecosystem may remain stable over hundreds of years because

- (1) species interdependence is absent
- (2) there is a lack of variety in the species
- (3) no competition exists between the species
- (4) there are natural checks on species

5. When organisms break the bonds of organic compounds, the organisms can

- (1) use the smaller molecules to plug the gaps in the cell membrane to slow diffusion
- (2) use the energy obtained to digest molecules produced by respiration that uses oxygen
- (3) obtain energy or reassemble the resulting materials to form different compounds
- (4) excrete smaller amounts of solid waste materials during vigorous exercise

6. The diagram to the right represents a food web.

The arrows only point away from "Grasses, shrubs" and not toward them. State one biological reason that this is so. [1]

Base your answers to questions 7 through 9 on the diagrams to the right of two cells, X and Y, and on your knowledge of biology.

7. Select one lettered organelle and write the letter of that organelle in the space below. Identify the organelle you selected.
