

V. BASE/CAMP MANAGER

A. BASE OF OPS SET UP

Introduction

- The Base of Operations (BoO), or Base in ICS terminology, is the location at which the primary logistics functions are coordinated and administered. The Incident Command Post (ICP) may be co-located with the Base. There is only one Base per Incident. The BoO is also where significant equipment maintenance, repair, reorder and procurement activities occur. Finally, the BoO is where task force managers plan and coordinate the various interrelated functions which enable the emergency operations to meet mission objectives as effectively and safely as possible.
- Because the BoO plays such an important role in keeping a task force operational over a period of days and weeks, site selection, setup and ongoing management of the facility are very important. Decisions made early on in a mission concerning the BoO will either help or hinder day-to-day operations for the remainder of that mission. The following are guidelines which may assist task force Logistics Specialists in the selection and setup process for establishing a safe, secure and efficient Base of Operations.

Site Selection

- The minimum area required for a task force BoO is 200 feet by 200 feet (40,000 ft²).
- All potential sites for the task force Base of Operations shall be evaluated by a team consisting of the following personnel:
 - Rescue Manager
 - Technical Team Manager
 - Logistics Specialist
 - Communications Specialist
 - Safety Officer, if available
 - Structures Specialist, if available
 - Task Force Leader (optional)
