Maths Literacy 2013 June Question Paper:

Science | Environment | Health Albert Zeyer, Regula Kyburz-Graber, 2021-12-09 This book provides a fascinating insight into the on going process of self reflection in the Science Environment Health S E H community The basic vision of a new S E H pedagogy is to establish a transdisciplinary dialogue between the three educational fields of science education environmental education and health education This approach finds growing interest among science educators Since 2014 the ESERA special interest group S E H has united both experienced and junior researchers all over Europe in a burgeoning research community This book presents a selection of results of these vibrant activities Systems theory has turned out to be a stimulating theoretical framework for S E H The limits of predictability in complex living systems result in structural uncertainty for decision making and they ask for emphasising and rethinking the role of pedagogical concepts like informed citizenship and scientific literacy They challenge crude scientific determinism in environmental and health education which all too often ends up with students eco and health depression Instead S E H conceives coping with uncertainty in terms of an interplay between cognitive and affective factors The horizon of the future remains always open Hope must never die in a new S E H pedagogy Chapter 3 is available open access under a Creative Commons Attribution 4 0 International License via link.springer.com
