**Teaching First-Year College Students** Maggie Murphy, 2019-05-15 The first year experience is an emerging hot topic in academic libraries and many librarians who work with first year students are interested in best practices for engaging and retaining them Professional discussion and interest groups conferences and vendor sponsored awards for librarians working with first year students are popping up left and right A critical aspect of libraries in the first year experience is effective information literacy instruction for first year students Research shows that despite growing up in a world rife with technology and information students entering college rarely bring with them the conceptual understandings and critical habits of thinking needed for finding evaluating and ethically using information in both academic and real world contexts Faculty in upper level courses expect students to learn about the research process in their first year of college and instructors in the first year curriculum expect librarians to teach this to their students Despite all this designing teaching and evaluating effective information literacy instruction specifically for first year students is not necessarily intuitive for instruction librarians That is why *Teaching First Year College Students A Practical Guide for Librarians* is a comprehensive how to guide for both new and experienced librarians interested in planning teaching and assessing library instruction for first year students The book Examines the related histories of library instruction and first year experience initiatives Summarizes and synthesizes empirical research and educational theory about first year students as learners and novice researchers Establishes best practices for engaging first year students through active learning and inclusive teaching Features excerpts from interviews with a number of instruction librarians who work with first year students in a range of positions and instructional contexts Includes examples of activities lesson plans and assessment ideas for first year library instruction for common first year course scenarios Includes a template to use for library instruction lesson planning Written by a library instruction coordinator with a graduate degree in First Year Studies and a

first year instruction librarian Teaching First Year College Students A Practical Guide for Librarians is the first comprehensive how to guide for both new and experienced librarians interested in planning coordinating teaching and assessing library instruction for first year students Creative and Critical Writing Prompts for College-Bound High School Students Collegiate Learning,2018-11-20 If you want to become a better writer you have to write nearly every day These writing prompts promote analytic and creative writing and thinking College success depends on a student's ability to think critically and to have opinions about a wide variety of topics Universities also want students even those on science math engineering or technology to have strong reading and writing skills These prompts were written by a college professor

**First-Generation College Students and Study Abroad** Simon Mary Asese Ahiokhai, Matt Daily, Layla Garrigues, 2025-09-26 This book showcases the experiences of first generation college students on study abroad programs Research shows that study abroad programs develop crucial life skills provide valuable experiences and enhance academic achievement However only a small percentage of first generation students access these opportunities By centering the voices and stories of first generation students this book advocates for equity in global education while reimagining study abroad as a more accessible and empowering experience This book asks how faculty administrators and staff can tap into the strengths of first generation students to increase the number of those who take advantage of their opportunities and explores the ways in which first generation students contribute to the success and vision of study abroad programs It will be of interest to scholars studying educational outreach higher education and comparative and international education *Current Index to Journals in Education* ,2000 **Resources in Education** ,1989 **Study Abroad Opportunities for Community**

**College Students and Strategies for Global Learning** Malveaux, Gregory F., Raby, Rosalind Latiner, 2019-01-11 Community colleges serve more students than any other institutional type in the United States and internationalization is an inherent component of community colleges that advances student knowledge facilitates student success and serves the needs of local communities As most community college students do not enroll in four year institutions their only opportunity for international experience is while they are in community college Study Abroad Opportunities for Community College Students and Strategies for Global Learning provides innovative insights into international study and education abroad through community colleges while discussing the value of adding study abroad programs to two year institutions This publication examines community colleges contributions in a local society study abroad opportunities peacebuilding international education and risk management Designed for administrative professionals community college leaders educators academicians and researchers this 2020 CIES Study Abroad and International Students SIG Best Book in Higher Education second place winner covers topics centered on study abroad programs at diverse community colleges **Composing Research** Cindy Johanek, 2000-04 Cindy Johanek offers a new perspective on the ideological conflict between qualitative and quantitative research approaches and the theories of knowledge that inform them With a paradigm that is sensitive to the

context of one's research questions she argues scholars can develop less dichotomous forms that invoke the strengths of both research traditions Context oriented approaches can lift the narrative from beneath the numbers in an experimental study for example or bring the useful clarity of numbers to an ethnographic study A pragmatic scholar Johaneck moves easily across the boundaries that divide the field and argues for contextualist theory as a lens through which to view composition research This approach brings with it a new focus she writes This new focus will call us to attend to the contexts in which rhetorical issues and research issues converge producing varied forms many voices and new knowledge indeed reconstructing a discipline that will be simultaneously focused on its tasks its knowledge makers and its students Composing Research is a work full of personal voice and professional commitment and will be a welcome addition to the research methods classroom and to the composition researcher's own bookshelf 2000 Outstanding Scholarship Award from the International Writing Centers Association
