**Churches in the mirror** Kobus Schoeman, 2020-01-01 Ecclesiology is the study of the church and has two focal points the one is the historical and doctrinal perspective on the church and the other is the church as situated in a local context in the sense of the local practices of actual congregations The ecclesiology or more correctly the ecclesiologies of this volume mainly focuses on the second aspect i.e. understanding the local congregation or parish as a community of believers A congregation may firstly be described by posing a theological question What is the local missional church or congregation all about This question may be answered from different perspectives but it remains essential to answer it from a theological perspective The first five chapters in this book focus mainly on a theological understanding of the congregation This is done from different disciplines within the study field of theology Congregations are secondly social realities and should be described and analysed through an analytical or empirical lens or to answer the question attached to the first empirical descriptive task of practical theology What is going on The remaining chapters use a quantitative and qualitative lens and give an empirical analysis of the congregation The intention is to critically reflect on the church and congregations ecclesiology from a theological and analytical perspective with an emphasis on the South African context It wants to map markers for the development of contemporary ecclesiologies and the different chapters are meant as mirrors to look in and reflect on the theological and contextual relevance of denominations and congregations in South Africa The Deficit Myth Stephanie Kelton, 2020-06-09 A New York Times Bestseller The leading thinker and most visible public advocate of modern monetary theory the freshest and most important idea about economics in decades delivers a radically different bold new understanding for how to build a just and prosperous society Stephanie Kelton's brilliant exploration of modern monetary theory MMT dramatically changes our understanding of how we can best deal with crucial issues ranging from poverty and inequality to creating jobs expanding health care coverage climate change and building resilient infrastructure Any ambitious proposal however inevitably runs into the buzz saw of how to find the money to pay for it rooted in myths about deficits that are hobbling us as a country Kelton busts through the myths that prevent us from taking action that the federal government should budget like a household that deficits will harm the next generation crowd out private investment and undermine long term growth and that entitlements are propelling us toward a grave fiscal crisis MMT as Kelton shows shifts the terrain from narrow budgetary questions to one of broader economic and social benefits With its important new ways of understanding money taxes and the critical role of deficit spending MMT redefines how to responsibly use our resources so that we can maximize our potential as a society MMT gives us the power to imagine a new politics and a new economy and move from a narrative of scarcity to one of opportunity **Worldwide Perspectives on Lesbians, Gays, and Bisexuals** Paula Gerber Ph.D., 2021-01-26 This three volume set is a rich resource for readers in any discipline interested in understanding the global regional and domestic experiences of LGB people This interdisciplinary set makes a vital contribution to understanding how

An Introduction to the Cognitive Science of Religion Claire White, 2021-03-14. In recent decades a new scientific approach to understand, explain and predict many features of religion has emerged. The cognitive science of religion (CSR) has amassed research on the forces that shape the tendency for humans to be religious and on what forms belief takes. It suggests that religion, like language or music, naturally emerges in humans with tractable similarities. This new approach has profound implications for how we understand religion, including why it appears so easily and why people are willing to fight and die for it. Yet it is not without its critics and some fear that scholars are explaining the ineffable mystery of religion away or showing that religion is natural proves or disproves the existence of God. An Introduction to the Cognitive Science of Religion offers students and general readers an accessible introduction to the approach, providing an overview of key findings and the debates that shape it. The volume includes a glossary of key terms and each chapter includes suggestions for further thought and further reading as well as chapter summaries highlighting key points. This book is an indispensable resource for introductory courses on religion and a much needed option for advanced courses.

**Marriage, Family and Relationships** Thomas A. Noble, Sarah K. Whittle, Philip S. Johnston, 2017-06-15. Family life has undergone revolutionary changes in Western society in the last sixty years, posing both theological and ethical challenges for the contemporary church. This book responds with wide ranging essays on sexuality, marriage, family life, singleness, same sex relationships, violence against women, anthropology, gender and culture. These chapters are essential reading for anyone concerned with Christian teaching on marriage and the family. They balance a clear loyalty to the church's historic and biblical teaching with a recognition that all doctrine is contextualized. There is a growing gap between the ethics of many Christians and those of wider society. So Christians have to be counter cultural. But the church also has to be self critical, differentiating between biblical revelation and cultural development. And it must know how to present unchanging Christian convictions to a constantly changing society. The contributors are Andy Angel, Daniel Block, Rosalind Clarke, Barry Danylak, Andrew Goddard, Stephen Holmes, David Instone-Brewer, A. T. B. McGowan, Nicholas Moore, Onesimus Ngundu, Oliver O'Donovan, Ian Paul, Andrew Sloane, Katy Smith, Elaine Storkey and Sarah Whittle.
