Teaching and Learning Secondary School Mathematics Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step.

Teaching Mathematics Creatively Linda Pound, Trisha Lee, 2021-09-30. This revised and updated third edition offers a range of strategies, activities, and ideas to bring mathematics to life in the primary classroom. Taking an innovative and playful approach to maths teaching, this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge, understanding, and enjoyment of the subject. In the creative classroom, mathematics becomes a tool to build confidence, develop problem-solving skills, and motivate children. The fresh approaches explored in this book include a range of activities such as storytelling, music, and construction, elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way. Key chapters of this book explore Learning maths outdoors, making more noise, making more mess, or working on a larger scale. Everyday maths, making sense of the numbers, patterns, shapes, and measures children see around them. Music and maths, the role of rhythm in learning, and music and pattern in maths. Stimulating, accessible, and underpinned by the latest research and theory, this is essential reading for trainee and practising teachers who wish to embed creative approaches to maths teaching in their classroom.

Language in Epistemic Access Caroline Kerfoot, Anne-Marie Simon-Vandenberg, 2018-07-26. This book focuses on how to address persistent linguistically structured inequalities in education, primarily in relation to South African schools but also in conversation with Australian work and with resonances for other multilingual contexts around the world. The book as a whole lays bare the tension between the commitment to multilingualism enshrined in the South African Constitution and language in education policy and the realities of the dominance of English and the virtual absence of indigenous African languages in current educational practices. It suggests that dynamic plurilingual pedagogies can be allied with the explicit scaffolding of genre-based pedagogies to help redress asymmetries in epistemic access and to re-imagine policies, pedagogies, and practices more in tune with the realities of multilingual classrooms. The contributions to this book offer complementary insights on routes to

improving access to school knowledge especially for learners whose home language or language variety is different to that of teaching and learning at school All subscribe to similar ideologies which include the view that multilingualism should be seen as a resource rather than a problem in education Commentaries on these chapters highlight evidence based high impact educational responses and suggest that translanguaging and genre may well offer opportunities for students to expand their linguistic repertoires and to bridge epistemological differences between community and school This book was originally published as a special issue of Language and Education

Social Studies Education in East Asian Contexts Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices In an increasingly volatile and unpredictable world the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority This task falls to social studies education which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it This is particularly important in East Asia where strong economic growth long held cultural values and diverse political systems create an environment that challenges young people on multiple fronts This book with its team of regional authors shows how different societies in the region are dealing with these challenges and what can be expected from future citizens The book will appeal to policy makers researchers and teachers interested in the current state of social studies education in East Asian societies
