Management Accounting and Control is a new textbook in English covering concepts and instruments of management accounting at an introductory level primarily at the Bachelor level but also suited for general management and MBA courses due to a strong focus on practical relevance. This textbook covers all topics that are relevant in management accounting in business organizations that are typically covered in German and Central European Bachelor courses on management accounting and control. After a general introduction to the field of management accounting and control, the book discusses cost management as an extension of cost accounting. Typical cost management instruments such as target costing, life cycle costing, and process based costing approaches are explained in detail. Differences between Anglo American activity based costing (ABC) and German process based costing are highlighted. The book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical application of the topic, such as developing a budget in practice. Another chapter is dedicated to a comparison of traditional budgeting with modern alternative budgeting approaches. A major part of the book is dedicated to the broad area of performance management. The relevance of financial statement information for performance management purposes is discussed in detail. In addition, the most widely spread financial performance indicators are illustrated using real world examples. The book also includes detailed content on value based management control concepts. In a consecutive chapter, performance measurement is linked with strategy while extensively discussing the Balanced Scorecard as a key tool in strategic performance management. The remaining parts of the book deal with management reporting as one of the main operative tasks in management accounting practice. The book closes with insight into new fields and developments that currently influence management accounting practices and research and promise to play an increasingly important role in the future.

Research in Management Accounting Ruhanita Maelah, 2010-10-12

This book focuses on research in management accounting that uses Malaysia's business environment as the scope of study. The motivation to embark on this publication was due to the recognition that although management accounting has received increasing interest from various organizations including government businesses and educators, published documents that report findings from research in management accounting undertaken in Malaysia are still limited. The objective of this book is to address the gap by providing readers with five research oriented articles on management accounting issues, namely: Performance Measurement Design in Service Organizations, Management Accounting and Control Systems in the Service Sector, Activity Based Costing, Intellectual Capital, and Management Accounting Practices and Customer Focused Manufacturing Strategy and Performance Measurement Systems. The articles are written by a pool of active researchers in the area of management accounting and are expected to have high academic value. Each is complete with a literature review, methodology, data analysis, and references. Even though this is the case, the articles have also been carefully chosen and

edited for the general reader This book is suitable as a reference for researchers academics managers accountants and policy makers Managerial Accounting Ray Garrison, Eric Noreen, Peter Brewer, 2010 This book provides process costing activity based costing cost volume profit inventory balanced scorecard overhead application and analysis budgeting financial statement analysis decentralization and segment reporting Managerial Accounting Ray H.
