**Video in Teacher Learning** Laura Baecher, 2019-06-12 Harness the power of video to promote reflective practice and teacher growth Video is the only feedback method that allows educators to view their teaching through their own eyes yet many K 12 professionals have yet to reap the benefits of this powerful technology This practical and comprehensive guide takes advantage of new methods and tools to capture teaching and learning and a broad base of current research to impact teacher thinking and actions Written for instructional coaches administrators supervisors and individual teachers it includes guidance on how to get started and how to engage in nonjudgmental and descriptive analysis scaffolding to counter anxiety and resistance and to cultivate a growth mindset chapters on specific contexts including developmental evaluative and problems of practice guidance for observation in specific grade bands and for specific student populations templates and links to videos for video analysis tasks step by step process outlines real world vignettes and application questions Drawing on broad evidence of the impact of video on teaching this is the guide for maximizing this powerful form of professional learning

Trust-Based Observations Craig Randall, 2020-07-30 The results are in observations are not improving teaching and learning Pertinently the Gates Foundation s recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement The way observations are currently designed serve as an obstacle to teacher risk taking Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built Trust Based Observations Maximizing Teaching and Learning Growth is a schema changing evaluation model that understands people perform at their best when they feel safe and supported It begins with twelve 20 minute observations per week followed by collegial conversations driven by reflective questions sharing observed teaching strengths and the building of safe and trusting relationships with teachers Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers trust When teachers

fully embrace risk taking and innovation it leads to remarkable teaching transformations and improved student learning
