Franz Joseph Gall Stanley Finger,Paul Eling,2019-04-30 Franz Joseph Gall 1758 1828 was always a controversial figure as was his doctrine later called phrenology Although often portrayed as a discredited buffoon who believed he could assess a person s strengths and weaknesses by measuring cranial bumps he was in fact a serious physician scientist who strove to answer timely questions about the mind brain and behavior In many ways a remarkable visionary his seminal ideas would become tenets of modern behavioral neuroscience Among other things he was the first scientist to promote publicly the idea of specialized cortical areas for diverse higher functions while taking metaphysics out of his new science of mind Moreover although he obviously placed too much emphasis on tell tale skull features mistakenly believing that the cranium faithfully reflects the features of underlying brain areas he fully understood the strength of convergent operations conducting neuroanatomical developmental cross species gender comparison and brain damage studies on both humans and animals in his attempts to unravel the mysteries of brain organization Rather than looking upon Gall s organology as one of science s great mistakes this book provides a fresh look at the man and his doctrine The authors delve into his motives what was known about the brain during the 1790s and the cultural demands of his time Gall is rightfully presented as an early 19th century biologist anthropologist philosopher and physician with an inquisitive mind and a challenging agenda namely how to account for species and individual differences in behavior In this well researched book readers learn why starting as a young physician in Vienna and continuing his life s work in Paris he chose to study the mind and the brain why he employed his various methods why he relied so heavily on cranial features and why he wrote what he did in his books Frequently using Gall s own words they show his impact in various domains including his approach to the insane and criminals before concluding with his final illness and more lasting legacy *British Books* ,1910 **The Annual American Catalogue ...** ,1900 **The Athenaeum** ,1913 **Masks** David Blundell,1994 In this book the reader is guided by three Sinhalese individuals who have dealt with their belief system as religious practitioners All are natives of the Sinhalese rural society yet they work and live in variant dimensions of that society As a matter of ethnographic method and ethical respect the entire endeavor of this research displays the values of the individuals who related their stories to me Since feedback to the ethnography is very important for the final analysis of the work the research participants reviewed the recorded and presented material Response was an essential assessment to the success or failure of the presented material as the presentations were made for the Sinhalese participants and their community As a record written and filmed in the form of life accounts it offers a step by step methodology for students This work marshals attention to the dimensions of a traditional belief system *The Century Illustrated Monthly Magazine* Josiah Gilbert Holland,Richard Watson Gilder,1906

Catalogue Dobell, P.J. & A.E., booksellers, London, 1913 **Moonlighting** Nathan Waddell, 2019-06-27 How and why did the life and music of Ludwig van Beethoven 1770 1827 matter to experimental writers in the early twentieth century Previous answers to this question have tended to focus on structural analogies between musical works and literary texts charting the many different ways in which poetry and prose resemble Beethoven's compositions This book takes a different approach It focuses on how early twentieth century writers chief among them E M Forster Aldous Huxley Wyndham Lewis Dorothy Richardson Rebecca West and Virginia Woolf profited from the representational conventions associated in the nineteenth century and beyond with Beethovenian culture The emphasis of Moonlighting falls for the most part on how modernist writers made use of Beethovenian legend It is concerned neither with formal similarities between Beethoven's music and modernist writing nor with the music of Beethoven per se but with certain ways of understanding Beethoven's music which had long before 1900 taken shape as habit myth cliché and fantasy and with the influence they had on experimental writing up to 1930 Moonlighting suggests that the modernists drew knowingly and creatively on the conventional It proposes that many of the most experimental works of modernist literature were shaped by a knowing reliance on Beethovenian consensus in short that the literary modernists knew Beethovenian legend when they saw it and that they were eager to use it The Literary World ,1899 **The Nation** ,1913 **Athenaeum and Literary Chronicle** ,1912 **The Saturday Review of Politics, Literature, Science and Art** ,1887 **Illustrated Catalogue of Books, Standard and Holiday** McClurg, Firm, Booksellers, Chicago, 1898 *Book News* ,1890 **Truth** ,1886 **Catalog of Copyright Entries.
