

Sir Isaac Newton

Isaac Newton was born on Dec. 25, 1642 in Woolsthorpe, Lincolnshire, England. He was expected to become a farmer like his late father, but he lacked the skills. Instead, he studied math and science at Trinity College, Cambridge, where he eventually became a professor in 1669.

While teaching at Cambridge, Newton published his most influential paper on modern science in 1687 titled, "The Mathematical Principles of Natural Philosophy;" the *Principia*. Inside the publication, were his Laws of Motion, which initially gave Newton his fame.

Years later, Newton retired from Cambridge in 1696, and began working for the Royal Mint (coin manufacturers); yet, he didn't stop dabbling in science. He enjoyed experimenting with prisms and found that light passing through a prism created a spectrum of colors. After numerous experiments, he published his theory of light in *Optics*. One year after its publication, Queen Anne knighted Newton in recognition of his scientific achievements.

On March 20, 1727, at the age of 85, Sir Isaac Newton passed away in his sleep. He was laid to rest at Westminster Abbey.

thirty six a little more than a year after the death of his father Robert Newton and only a few months after his marriage to Harriet Ayscough daughter of James Ayscough of Market Overton in Rutlandshire This lady was accordingly left in a state of pregnancy and appears to have given a premature birth to her only and posthumous child The helpless infant thus ushered into the world was of such an extremely diminutive size 2 and seemed of so perishable a frame that two women who were sent to Lady Pakenham s at North Witham to bring some medicine to strengthen him did not expect to find him alive on their return Providence however had otherwise decreed and that frail tenement which seemed scarcely able to imprison its immortal mind was destined to enjoy a vigorous maturity and to survive even the average term of human existence The estate of Woolsthorpe in the manor house of which this remarkable birth took place had been more than a hundred years in the possession of the family who came originally from Newton in Lancashire but who had previous to the purchase of Woolsthorpe settled at Westby in the county of Lincoln The manor house of which we have given an engraving is situated in a beautiful little valley remarkable for its copious wells of pure spring water on the west side of the river Witham which has its origin in the neighbourhood and commands an agreeable prospect to the east towards Colsterworth The manor of Woolsthorpe was worth only 30l per annum but Mrs Newton possessed another small estate at Sewstern 3 which raised the annual value of their property to about 80l and it is probable that the cultivation of the little farm on which she resided somewhat enlarged the limited income upon which she had to support herself and educate her child *Life of Sir Isaac*
