Industrial Applications Associated With Industry 4.0 Alberto Ochoa-Zezzatti, Diego Oliva, Aboul Ella

Hassanien, 2021-07-01 This book includes chapters related to the analysis of cultural differences as a tool to enrich tacit knowledge and make processes more efficient the factors that influence job satisfaction and the value of social capital as a competitive strategy to achieve productivity and competitiveness of organizations in addition to research of the utmost importance to discover the facets of the diamond with respect to the symbolic capital of the organizations where Generation Z will work and how it will discover the best time to establish an innovation ecosystem that will influence its work trajectory Industry 4.0 requires a major paradigm shift since human capital is a source of competitive advantage Being competitive enables to a company a region a society or a country the power to advance in different areas contributing to the benefit of a social group therefore and organizations need to make efforts that lead to adding value and generate a competitive advantage Industrial applications based on artificial intelligence can change our lives in just one generation The chapters in this book show progress and challenges related to real world applications as well as the need to strengthen human capital to achieve systemic and comprehensive competitiveness required in the XXI century *An Oral-Formulaic Study of the Qur'an*

Andrew G. Bannister, 2014-04-24 The Qur'an makes extensive use of older religious material stories and traditions that predate the origins of Islam and there has long been a fierce debate about how this material found its way into the Qur'an This unique book argues that this debate has largely been characterized by a failure to fully appreciate the Qur'an as a predominately oral product Using innovative computerized linguistic analysis this study demonstrates that the Qur'an displays many of the signs of oral composition that have been found in other traditional literature When one then combines these computerized results with other clues to the Qur'an's origins such as the demonstrably oral culture that both predated and preceded the Qur'an as well as the folk memory in the Islamic tradition that Muhammad was an oral performer these multiple lines of evidence converge and point to the conclusion that large portions of the Qur'an need to be understood as being constructed live in oral performance Combining historical linguistic and statistical analysis much of it made possible for the first time due to new computerized tools developed specifically for this book Bannister argues that the implications of orality have long been overlooked in studies of the Qur'an By relocating the Islamic scripture firmly back into an oral context one gains both a fresh appreciation of the Qur'an on its own terms as well as a fresh understanding of how Muhammad used early religious traditions retelling old tales afresh for a new audience **Navigating the Landscape of FAIR Data**
