The African Food Environments Amos Laar, Kaleab Baye, Anna Lartey, Francis Zotor, Gershim Asiki, 2023-09-05 In many respects the continent of Africa is in transition. Prominent among them currently is the nutrition transition. One consequence of the nutrition transition is the increase in prevalence of nutrition related non communicable diseases (NCDs) such as obesity, type 2 diabetes, cardiovascular diseases and certain cancers. Although NCDs are a global public health problem, the rate of increase in NCDs morbidity and mortality in some African countries is staggering. This surge has been linked to modifiable environmental factors, factors that facilitate the consumption of obesogenic energy dense nutrient poor foods rather than unrefined cereals, fruits and vegetables. It has long been recognized that the physical and social environments in which people live, work and eat are critical determinants of their health. More recently, there has been a greater focus on the food environment as a key determinant of health. Available evidence shows that unhealthy food environments drive unhealthy diets and unhealthy diet is one of four main risk factors for NCDs.

**Quality education** Muchativugwa L. Hove, Martha Matashu, 2021-11-30 This book investigates the intersections between education, social justice, gendered violence and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project and articulate the larger phenomenon of human rights violations in Africa and how in turn the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact and interpret quality education. The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces. This book is essential reading for scholars seeking a solid grounding in exploring quality education, the instances of epistemic disobedience, the political implications of place and power and human rights in theory and practice.

*The Emerging Policy for Green Economy and Social Development in Limpopo, South Africa* Agnes Musyoki, 2012 This paper evaluates the emerging green economy in South Africa using ideas from the concept of sustainable rural livelihoods which are intimately connected to ecological services in many developing countries. It finds that African communities and governments are prioritising green economy for job creation, poverty alleviation and reducing inequalities while addressing global environmental concerns. What remains problematic, however, is how these objectives are to be achieved. The paper argues that one of the key challenges in South Africa is the gap between policy and implementation of sustainable development, the Millennium Development Goals and other globally driven initiatives. The paper emphasises that green economy policy needs to consider poverty reduction and women's empowerment in order to promote rural

sustainable development Publisher description      *Age-Inclusive ICT Innovation for Service Delivery in South Africa* Vera Roos,Jaco Hoffman,2022-10-03      **Handbook on Youth Activism** Jerusha Conner,2024-02-12 This dynamic Handbook offers state of the art analysis of the new generation of youth activists who are demanding change Bringing together eminent scholars rising academic stars and youth activists this Handbook provides a unique and essential insight into the power of youth activism today      *Working with indigenous knowledge* Fhumulani M. Mulaudzi,Rachel T. Lebese,2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research
