Life Science Essay For 2014 For Paper of Grade 12:

Mind Mapping and Artificial Intelligence Jose Maria Guerrero, 2022-10-22 In the near future we will see an increase in the development and use of all sorts of AI applications. Some of the more promising areas will be Finance, Healthcare, IoT, Manufacturing, Journalism, and Cybersecurity. Many of these applications generate a great amount of complex information. Natural Language Understanding is one of the most clear examples. Traditional ways of visualizing complex information, namely linear text, web pages, and hyperlink-based applications, have serious productivity problems. Users need a lot of time to visualize the information and have problems seeing the whole picture of the results. Mind mapping is probably the only way of reducing the problems inherent in these traditional ways of visualizing complex information. Most people have no clear idea about the advantages of mind mapping or the problems created by the traditional ways of visualizing complex information. The goal of Mind Mapping and Artificial Intelligence is to provide readers with an introduction to mind mapping and artificial intelligence, to the problems of using traditional ways of visualizing complex information, and as an introduction to mind mapping automation and its integration into Artificial Intelligence applications such as NLU and others. As more applications of Artificial Intelligence are developed in the near future, the need for the improvement of the visualization of the information generated will increase exponentially. Information overload will soon also happen in AI applications. This will diminish the advantages of using AI. Author Jos Maria Guerrero is a long-time expert in mind mapping and visualization techniques. In this book, he also introduces readers to MindManager mind mapping software, which can considerably reduce the problems associated with the interpretation of complex information generated by Artificial Intelligence software. Provides coverage of the fundamentals of mind mapping and visualization applied to Artificial Intelligence applications. Includes coverage of the scientific bases for mind mapping for the visualization of complex information. Introduces MindManager software for mind mapping. Introduces the author's MindManager toolkit for the readers to use in development of new mind mapping applications. Includes case studies and real-world applications of MindManager for AI applications, including examples using IBM Watson NLU.

Development Economics Shahrukh Rafi Khan, 2019-10-23 Following the 2007-2009 financial and economic crises, there has been an unprecedented demand among economics students for an alternative approach which offers a historical, institutional, and multidisciplinary treatment of the discipline. Economic development lends itself ideally to meet this demand, yet most undergraduate textbooks do not reflect this. This book will fill this gap, presenting all the core material needed to teach development economics in a one-semester course while also addressing the need for a new economics and offering flexibility to instructors. Rather than taking the typical approach of organizing by topic, the book uses theories and debates to guide its structure. This will allow students to see different perspectives on key development questions and therefore to understand more fully the contested nature of many key areas of development economics. The book can be used as a standalone textbook on development economics or to accompany a more traditional text. *STEM:*
