Life Orientation Question Paper September 23:

Resources in Education ,1982 *Envy Up, Scorn Down* Susan T. Fiske,2011-04-21 An insightful examination of why we compare ourselves to those above and below us The United States was founded on the principle of equal opportunity for all and this ethos continues to inform the nation s collective identity In reality however absolute equality is elusive The gap between rich and poor has widened in recent decades and the United States has the highest level of economic inequality of any developed country Social class and other differences in status reverberate throughout American life and prejudice based on another s perceived status persists among individuals and groups In *Envy Up Scorn Down* noted social psychologist Susan Fiske examines the psychological underpinnings of interpersonal and intergroup comparisons exploring why we compare ourselves to those both above and below us and analyzing the social consequences of such comparisons in day to day life What motivates individuals groups and cultures to envy the status of some and scorn the status of others Who experiences envy and scorn most *Envy Up Scorn Down* marshals a wealth of recent psychological studies as well as findings based on years of Fiske s own research to address such questions She shows that both envy and scorn have distinctive biological emotional cognitive and behavioral characteristics And though we are all wired for comparison some individuals are more vulnerable to these motives than others Dominant personalities for example express envy toward high status groups such as the wealthy and well educated and insecurity can lead others to scorn those perceived to have lower status such as women minorities or the disabled Fiske shows that one s race or ethnicity gender and education all correlate with perceived status Regardless of whether one is accorded higher or lower status however all groups rank their members and all societies rank the various groups within them We rate each group as either friend or foe able or unable and accordingly assign them the traits of warmth or competence The majority of groups in the United States are ranked either warm or competent but not both with extreme exceptions the homeless or the very poor are considered neither warm nor competent Societies across the globe view older people as warm but incompetent Conversely the very rich are generally considered cold but highly competent *Envy Up Scorn Down* explores the nuances of status hierarchies and their consequences and shows that such prejudice in its most virulent form dehumanizes and can lead to devastating outcomes from the scornful neglect of the homeless to the envious anger historically directed at Tutsis in Rwanda or Jews in Europe Individuals groups and even cultures will always make comparisons between and among themselves *Envy Up Scorn Down* is an accessible and insightful examination of drives we all share and the prejudice that can accompany comparison The book deftly shows that understanding envy and scorn and seeking to mitigate their effects can prove invaluable to our lives our relationships and our society Host Bibliographic Record for Boundwith Item Barcode 30112107850775 and Others ,1916 **Research Paper** Norman T.
