Operation Lock and the War on Rhino Poaching John Hanks, 2015-05-08 The aggressive poaching of rhinos needs to be countered with equal aggression So argued Prince Bernhard of the Netherlands the founder president of the World Wide Fund for Nature WWF at a 1987 meeting with John Hanks conservation expert and WWF s head in Africa The result was Operation Lock a secret initiative funded by Prince Bernhard and staffed by former SAS operatives Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states Namibia Zambia Botswana Swaziland and Mozambique Its operatives planned to train game rangers to pose as rhino horn traders in order to entrap buyers and to expose the kingpins who were driving the trade It was a controversial approach all the more because it was working within apartheid South Africa in the late 1980s When the existence of the project was finally leaked WWF denied any involvement and John Hanks took the fall In *Operation Lock and the War on Rhino Poaching* John Hanks finally tells the story of these explosive events from 25 years ago As a leading international authority on conservation he also deals with the scourge of rhino poaching up to the present and gives powerful and controversial criticism of some of the current policies to curb poaching

Analysis of Rhino Poaching in KwaZulu-Natal, South Africa, 2011 *Saving the Last Rhinos* Grant Fowlds, Graham Spence, 2020-05-05 The remarkable story of Grant Fowlds who has dedicated his life to saving the imperiled rhinos vividly told with Graham Spence co author of the bestselling *The Elephant Whisperer* What would drive a man to smuggle rhino horn back into Africa at great risk to himself This is just one of the situations Fowlds has put himself in as part of his ongoing fight against poaching in order to prove a link between southern Africa and the illicit lucrative trade in rhino

horn in Vietnam Shavings of rhino horn are sold as a snake oil cures but a rhino s horn has no magical medicinal properties whatsoever Yet it is for this that rhinoceroses are being killed at an escalating rate that puts the survival of the species in jeopardy This corrupt illegal war on wildlife has brought an iconic animal to the brink of extinction Growing up on a farm in the eastern Cape of South Africa Grant developed a deep love of nature turning his back on hunting to focus on saving wildlife of all kinds and the environment that sustains both them and us He is a passionate conservationist who puts himself on the front line of protecting rhinos in the wild right now against armed poachers and in the long term through his work with schoolchildren communities and policymakers

Asian Rhinos Mohd. Khan bin Momin Khan,Nico J. van Strien,IUCN/SSC Asian Rhino Specialist Group,1997 There are currently three species of Asian rhino the Indian or greater one horned Asian rhino the Javan or lesser one horned Asian rhino and the Sumatran or Asian two horned rhino Today all three are threatened with extinction and two the Sumatran rhino and Javan rhino critically so Although the Indian rhino is to be found in greater numbers than the other two the threats to this species nevertheless remain significant As in the case of the African rhinos the threats to the Asian rhinos stem from poaching for the horn the primary demand for which is in traditional Chinese medicine but which is also a speculator s commodity in several consumer nations However a further threat to these animals is also posed by the destruction of their habitat Indeed two of these species inhabit the tropical rainforest which is being destroyed This action plan describes the major requirements for rhino conservation and describes some of the programmes which can and are being implemented to stem the threats to these species such as managed breeding and the in situ conservation of their habitats

Asian Rhinos ,1989

Rhino Poaching Janina Naef,2016 Rhino horn is very popular in Asia as it is a status symbol and used as medicine That is one reason why the number of these animals is decreasing continuously In 2007 13 rhinos were poached in South Africa while in 2015 the number increased to 1175 rhinos This Matura Paper deals with problems of rhino poaching in South Africa It poses into the question if it is still possible to see rhinos in the future and examines what should be done to save this species from extinction Therefore 5 theses has been stated which consist of political financial protection measures and enlightenment of local and Asian people Thereby an interview has been conducted with a conservationist in addition to research in a volunteering project in South Africa regarding these theses The results prove the problems already stated If there are no changes in one of these problems the rhino doubtfully has a future
