Life Orientation Question Paper 2014 September:

Computational Methods for Communication Science Wouter van Atteveldt, Tai-Quan Peng, 2021-03-29 Computational Methods for Communication Science showcases the use of innovative computational methods in the study of communication. This book discusses the validity of using big data in communication science and showcases a number of new methods and applications in the fields of text and network analysis. Computational methods have the potential to greatly enhance the scientific study of communication because they allow us to move towards collaborative large N studies of actual behavior in its social context. This requires us to develop new skills and infrastructure and meet the challenges of open, valid, reliable, and ethical big data research. This volume brings together a number of leading scholars in this emerging field contributing to the increasing development and adaptation of computational methods in communication science. The chapters in this book were originally published as a special issue of the journal *Communication Methods and Measures*. Unchanging Witness S. Donald Fortson, Rollin G. Grams, 2016-02-01 In *Unchanging Witness* Donald Fortson and Rollin Grams articulate the consistent orthodox view historically held everywhere, always and by all, by presenting primary sources throughout Christian history and by interpreting the biblical texts in their cultural contexts. *A History of Human Rights Society in Singapore* Jiyoung Song, 2017-05-08 To celebrate Singapore's fiftieth anniversary for its independence from Malaysia in 2015, 35 students, academics, and activists came together to discuss and write about pioneering Singaporean human rights activists and their under-reported stories in Singapore. The city-state is known for its remarkable economic success while having strict laws on individual freedom in the name of national security, public order, and racial harmony. Singapore's tough stance on human rights, however, does not negate the long and persistent existence of a human rights society that is little known to the world until today. This volume, composed of nine distinctive chapters, records a history of human rights activists, their campaigns, main contentions with the government, survival strategies, and other untold stories in Singapore's first 50 years of state building. Yearbook of International Organizations 2014-2015 (Volume 4) Union Of International Associations, Union of International Associations, 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO) collected and documented by the Union of International Associations can be found here. In addition to the history, aims, and activities of international organizations, with their events, publications, and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved, and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research bibliography on international organizations and transnational associations. **The State, Ulama and Islam in Malaysia and Indonesia** Norshahril Saat, 2025-10-01 The Suharto 1966
