English Language Learners and the New Standards Margaret Heritage, Aída Walqui, Robert Linqunti, 2020-01-15 In English Language Learners and the New Standards three leading scholars present a clear vision and practical suggestions for helping teachers engage ELL students in simultaneously learning subject area content analytical practices and language This process requires three important shifts in our perspective on language and language learning from an individual activity to a socially engaged activity from a linear process aimed at correctness and fluency to a developmental process focused on comprehension and communication and from a separate area of instruction to an approach that embeds language development in subject area activities In English Language Learners and the New Standards the authors Clarify the skills and knowledge teachers need to integrate content knowledge and language development Show how teachers can integrate formative assessment in ongoing teaching and learning Discuss key leverage points and stress points in using interim and summative assessments with ELLs Provide classroom vignettes illustrating key practices Finally the authors explain the theories and research that underlie their vision and examine the role of policy in shaping pedagogy and assessment for ELL students

Getting Evidence into Education Stephen Gorard, 2020-03-31 Worldwide there has been considerable progress in the quality of research evidence generated for use in education but not the equivalent growth in knowledge of how best to get this evidence into actual use Yet with far reaching implications all of education is damaged when persuasive but poor quality evidence has widespread influence or good research lies unused Focused on the work of the Durham University Evidence Centre for Education Getting Evidence into Education addresses this problem examining what can be done to improve the take up of suitable research evidence and inform the public service of education Containing a variety of case studies from evidence based policies for early childhood education in Brazil to the use of evidence on contextualized admissions to Scottish universities the volume explores a variety of different ways to approach the problem addressing the questions What is the existing evidence on different approaches to getting research evidence into use What are the factors which influence the uptake of high quality research evidence by policy or practice Which are the most effective pathways for evidence into use in particular contexts Considering both the practical and ethical implications the book builds towards key recommendations for the research community practitioner bodies and policy makers and advisors directing them on how to communicate better with each other for the benefit of everyone

Associations between Reading and Mathematics: Genetic, Brain Imaging, Cognitive and Educational Perspectives Sarit Ashkenazi, Orly Rubinsten, Bert De Smedt, 2017-10-05 Converging evidence demonstrates a strong link between reading and mathematics multiple cognitive processes are shared between reading and mathematics including the representation and retrieval of

symbolic information attention working memory and cognitive control. Additionally, multiple brain networks are involved in both math and reading, and last common genetic factors might influence both reading and math. Hence, it comes as no surprise that there are meaningful associations between aspects of math and reading abilities. Moreover, comorbidity rates between math learning disabilities (MD) and reading disabilities (RD) are high, up to 66%, and the prevalence rate of the comorbid condition is reported to be more common than the prevalence rate of isolated math learning disabilities. Accordingly, the goal of the research topic is to explore the underlying mechanisms of this overlap between reading and math. The research topic aims to include the following topics:

Genetics: It has been found that both RD and MD are based on genetic factors and run in families. Moreover, math problem solving shares significant genetic overlap with general cognitive ability and reading decoding, whereas math fluency shares significant genetic overlap with reading fluency and general cognitive ability. Hence, this topic will explore the shared and unique genetic risk factors to RD and MD. In addition to shared and unique genetic influence on reading and math.

Neural perspective: Converging evidence from both structural and multiple functional imaging studies involving a wide range of numerical tasks points to the intraparietal sulcus (IPS) as a core region that involves in quantity manipulation. However, several additional brain areas such as frontoparietal and temporoparietal areas were found to be involved in numerical tasks. Individuals with MD show deficits in a distributed set of brain regions that include the IPS, fusiform gyrus in posterior brain regions, and prefrontal cortex regions. Similarly, converging evidence indicates that the left hemisphere regions centered in the fusiform gyrus, temporoparietal cortex, and prefrontal cortex regions are strongly involved in typical reading and present lower activity, connectivity, or abnormal structure in RD. Thus, there is a meaningful neural overlap between reading and math. Hence, the authors can submit empirical studies on the role of several of brain regions that are involved in math and reading commonality and diversity both in the typical and atypical development.

Cognitive factors: Factors that play a role in mathematics and reading and comorbidity between RD and MD. There is a long-lasting debate whether MD and RD originate from unique cognitive mechanisms or not. Multiple cognitive processes are shared between reading and mathematics. Therefore, impairments in any one of domain-general skills could conceivably play an important role in both pure and comorbid conditions. Moreover, it has been suggested that phonological processing has a significant role in some aspects of numerical processing such as retrieval of arithmetical facts.

Education: It will be interesting to look at the effect of interventions that aim to improve reading such as phonological awareness and their transfer effect on improving mathematical processing. Alternatively, it will be good to test whether math interventions will improve reading.

The Struggle to Reform Our Colleges Derek Bok, 2017-08-28. Why efforts to improve American higher educational attainment haven't worked and where to go from here. During the first decade of this century, many commentators predicted that American higher education was about to undergo major changes that would be brought about under the stimulus of online learning and other technological advances. Toward the end of the decade, the president of the United States declared that

America would regain its historic lead in the education of its workforce within the next ten years through a huge increase in the number of students earning quality college degrees. Several years have elapsed since these pronouncements were made yet the rate of progress has increased very little if at all in the number of college graduates or the nature and quality of the education they receive. In *The Struggle to Reform Our Colleges* Derek Bok seeks to explain why so little change has occurred by analyzing the response of America's colleges, the influence of students, employers, foundations, accrediting organizations, and government officials, and the impact of market forces and technological innovation. In the last part of the book Bok identifies a number of initiatives that could improve the performance of colleges and universities. The final chapter examines the process of change itself and describes the strategy best calculated to quicken the pace of reform and enable colleges to meet the challenges that confront them.

Advancing the Frontiers of Heterodox Economics Tae-Hee Jo, Zdravka Todorova, 2015-07-30 This collection of essays honors the life and work of one of the most prominent and fervent heterodox economists, Frederic S. Lee, who has been at the heart of the heterodox economics movements for the past three decades. Authors in this book demonstrate that heterodox economic thought has transcended the criticism of mainstream economics and more importantly that constructive developments are in the making by way of cross communications among various heterodox economics traditions. Frederic S. Lee's contributions to heterodox economics are centered on three themes: the making of a history and identity of heterodox economics; heterodox microeconomics; and the heterodox analysis of social provisioning. Part I addresses the importance of history, theory, research methods, and institutions in the making of the identity of heterodox economics as an alternative to mainstream economics. Part II delves into heterodox microeconomic theories in particular investment, pricing, competition, markets, and market governance as foundations of heterodox macroeconomic analyses. Part III expands the analysis of the capitalist social provisioning process with an emphasis on its subsystems and their relationships over historical time. Part IV encapsulates the life and work of Frederic S. Lee. Throughout his intellectual life, Frederic S. Lee has shown to many that the development of heterodox economics is rendered possible by unselfish and ceaseless efforts to build both theory and institutions. Essays in this book attest that establishing an alternative critical theory to the status quo is not only possible but also serviceable to the majority of the population.

The Routledge Handbook of Financial Literacy Gianni Nicolini, Brenda J. Cude, 2021-12-30 Financial literacy and financial education are not new topics even though interest in these topics among policymakers, financial authorities, and academics continues to grow. The Routledge Handbook of Financial Literacy provides a comprehensive reference work that addresses both research perspectives and practical applications to financial education. This is the first volume to summarize the milestones of research in financial literacy from multiple perspectives to offer an overview. The book is organized into six parts. The first three parts provide a conceptual framework which discusses what financial literacy is, how it should be measured, and explains why it represents a relevant topic and effective tool in enhancing decision making among consumers as well as consumer protection strategies.

Part IV addresses the connection between financial education and financial literacy with chapters about financial education in school settings as well as for adults This part includes an analysis of the role of Fintech and the use of gamification in financial education Part V is a collection of contributions that analyze financial literacy and financial education around the world with a focus on geographical areas including the U S South America Western Europe Eastern Europe Asia and Africa This part also considers how financial literacy should be addressed in the case of Islamic finance The concluding part of the book examines how financial literacy is related to other possible approaches to consumer finance and consumer protection addressing the relationships between financial literacy and behavioral economics financial well being and financial inclusion This volume is an indispensable reference for scholars who are new to the topic including undergraduate and graduate students and for experienced researchers who wish to enrich their knowledge policymakers seeking a broader understanding and an international perspective and practitioners who seek knowledge of best practices as well as innovative approaches
