CHAPTER 7

Basic Elements of Planning and Decision Making

Part III of this book is entitled PLANNING AND DECISION MAKING. Its fundamental purpose is to discuss the first basic management function—planning and decision making.

Part III has four chapters. Chapter 7 introduces the basic elements of planning and decision making. Chapter 8 focuses on strategy and strategic planning. Chapter 9 addresses the management of decision making. Entrepreneurship is the focus of Chapter 10.

Teaching Tip: Some instructors prefer to cover the material in Chapter 10 separately at the end of the course. If you prefer this method, the chapter is written so that it can be covered “out of sequence.”

CHAPTER SUMMARY

Chapter 7 is the first of four devoted to planning and decision making. Its purpose, therefore, is to introduce the basic elements of this management function and to build a foundation for the more detailed coverage of the material that follows in the remaining chapters of the part.

LEARNING OBJECTIVES

After covering this chapter, students should be able to:

1. Summarize the function of decision making and the planning process.
2. Discuss the purpose of organizational goals, identify different kinds of goals, discuss who sets goals, and describe how to manage multiple goals.

Organizational Behavior and Management in Health and Medicine James K. Elrod, John L. Fortenberry, Jr., 2024-07-10 This comprehensive textbook on healthcare organizational behavior and management uniquely bridges theory and practice, directing significant attention toward operationalization in health and medical settings. This blend of theory and practice differentiates the content of this book from that of related academic and professional books that tend to discuss theory at length with limited attention being directed toward practical applications. This approach ultimately affords readers with a working knowledge of the subject matter, which must be mastered to successfully operate healthcare organizations and a real-world skill set for use in practice. The contents of the text encompass a fairly broad spectrum of organizational behavior and management within the context of the healthcare industry and its associated organizations. Among the topics covered: Leadership in Health and Medicine, Motivation in Health and Medicine, Communication in Health and Medicine, Strategy in Health and Medicine, Ethics and Social Responsibility in Health and Medicine, Organizational Culture in Health and Medicine, Groups and Teams in Health and Medicine, Power and Politics in Health and Medicine. Beyond its efficient presentation of core facets of organizational behavior and management, the book features practical insights in each chapter from the authors' experiences as leaders at a health system. These passages share real-world insights, often involving unique applications, innovative thinking, and other creative perspectives from practice. These viewpoints are invaluable for helping readers to ground the theoretical overviews presented in each chapter, bolstering knowledge and understanding. A glossary of organizational behavior and management terminology is also included. Organizational Behavior and Management in Health and Medicine serves as a primer featuring principles and practices with intensive application and operational guidance. The text, with its learning objectives, chapter summaries, key terms, and exercises, is ideally suited for professors and students of health administration, medicine, nursing, and allied health. The book also can serve as a refresher for healthcare executives and managers, e.g., administrators, nurses, physicians, and as a useful reference for anyone with an interest in learning about administrative practices in health and medical settings.

Why Management Fails. How Organizations Function and How to Impact Them, 2021-11-23 Master's Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 Otto Beisheim School of Management Vallendar Kellogg WHU Executive MBA language English abstract Despite innovations in management science leaders struggle to adapt their organizations against rapid environmental changes Based on the assumption that this struggle results from obsolete management paradigms this work aims to outline a systemic view of organizations and groups as well as approaches to manage and change them This work adopts a fundamental question What dynamics evolve in organizations and groups or teams as a significant part of organizations that increase or decrease management's influence and the organizations or groups ability to induce change This work delivers a systematic approach to equip readers with analytical tools to arrive at their own understanding of a wide range of different organizations or groups This literature based work describes causal and systemic theories to explain human behavior based on an analysis of organizations based on systems theory Looking through different lenses provides insights into organizations underlying structures namely the machine game or facade metaphors Formal and informal structures and their interactions have been analyzed in different lifecycle stages immobility and replaceability The construction of a systemic view of groups shows group specific dynamics and behavioral patterns The specialization in groups drives local best practices expected informal behavior and a narrowed perspective of what is essential for the department or organization These local rationalities are critical to leading groups or organizations

The explanations of groups and organizations clarify that a hierarchical understanding or an understanding that an organization or even its culture can be rationally planned is misleading. Organizations continually adjust to changing conditions in their environment but unfortunately not as their executives intend. Therefore the change of organizations or groups is hypothesis driven experimentation that integrates the change of the change from the beginning. Systemic interventions are based on observations and do not claim predictability. The manager's primary tasks are to develop team reflexivity and autonomous decision making as well as increase variation and promote selections in the group or organization. Incremental approaches to management group reflection and development and lateral and formal mechanisms of influence must be utilized in combination with a comprehensive organizational analysis.
