**Management of Natural Resources in a Changing Environment** N. Janardhana Raju, Wolfgang Gossel, M. Sudhakar, 2014 *Sustaining Natural Resources in a Changing Environment* Linda Hantrais, Ruth Kattumuri, Ashley Thomas Lenihan, 2020-06-09 Climate change and environmental degradation have intensified the pressures on crucial resources such as food and water security and air quality In this collection academic researchers and practitioners who have lived and worked in countries as geographically and culturally diverse as Brazil China India Ghana Palestine Uganda and Venezuela draw on their wide ranging international and inter sectoral experience to offer valuable comparative insights into the relationship between research and evidence based policy for sustaining natural resources Their contributions provide a novel mix of disciplinary perspectives ranging across geography ecology social policy the political economy philosophy international development engineering technology architecture and urban planning They examine the institutions involved in generating and mediating evidence about the sustainability of natural resources in a changing environment and the different methodologies employed in collecting and assessing evidence informing policy and contributing to governance The authors demonstrate not only that social science evidence on governance and policy implementation to sustain natural resources must complement natural science inputs but also that local communities must be an integral part of any programme development This book was originally published as a special issue of Contemporary Social Science **Sustainable Bioresource Management** Ratikanta Maiti, Humberto González Rodríguez, Ch. Aruna Kumari, Debashis Mandal, 2020-04-21 This new volume emphasizes the drastic quantitative and qualitative transformation of our surrounding environment and looks at bioresource management and the tools needed to manage environmental stresses This unique compilation and interpretation of concrete scientific ventures undertaken by environmental specialists at the global level explores research dedicated to the management of natural resources by controlling biotic and abiotic factors that make the earth vulnerable to these stresses The chapter authors look at all types of bioresources on earth and their management at times of stress crisis focusing on the need for documentation validation and recovery of ethnic indigenous knowledge and practices that could have great impact in stress management The book looks at topics in nature and changing climate management adaptation and mitigation such as the effects of climate change on agriculture and horticulture on timber harvesting and on forest resources Also specifically discussed are crop resources management seed crops tree seedlings soil management and conservation practices The volume also includes chapters on animal resources management *Climate Change and Natural Resources* Hüseyin Gökçekuş, Youssef Kassem, 2024-11-26 This book provides an overview of promoting the conservation and sustainable use of natural resources and reducing waste and pollution while also addressing the challenges posed by climate change Climate change and natural resources are closely linked as changes in the climate can have significant impacts on the availability and quality of natural resources such as water air land forests and oceans Environmental management and

sustainable development are crucial to address the challenges posed by climate change and to ensure the long term viability of natural resources Also the planning implementation and monitoring of actions that aim to protect and enhance the environment while promoting sustainable development are discussed In the context of climate change and natural resources sustainable development involves finding ways to reduce greenhouse gas emissions and adapt to the impacts of climate change while also promoting resource conservation and sustainable use As a result this book is expected to contribute to the existing literature and provide an in depth study that gives a fresh approach to the academic and multiple stakeholders including governments businesses civil society and individuals *The Economics of Adapting Fisheries to Climate Change* OECD,2011-01-28 This book highlights the economic and policy aspects of adapting fisheries to climate change including strengthening global governance a broader use of rights based management ecosystem protection the ending of environmental harmful subsidies and use of aquaculture

**Historical Environmental Variation in Conservation and Natural Resource Management** John A. Wiens,Gregory D. Hayward,Hugh D. Safford,Catherine Giffen,2012-09-04 In North America concepts of Historical Range of Variability are being employed in land management planning for properties of private organizations and multiple government agencies The National Park Service U S Fish Wildlife Service Bureau of Land Management U S Forest Service and The Nature Conservancy all include elements of historical ecology in their planning processes Similar approaches are part of land management and conservation in Europe and Australia Each of these user groups must struggle with the added complication of rapid climate change rapid land use change and technical issues in order to employ historical ecology effectively Historical Environmental Variation in Conservation and Natural Resource Management explores the utility of historical ecology in a management and conservation context and the development of concepts related to understanding future ranges of variability It provides guidance and insights to all those entrusted with managing and conserving natural resources land use planners ecologists fire scientists natural resource policy makers conservation biologists refuge and preserve managers and field practitioners The book will be particularly timely as science based management is once again emphasized in United States federal land management and as an understanding of the potential effects of climate change becomes more widespread among resource managers Additional resources for this book can be found at [www.wiley.com/go/wiens/historicalenvironmentalvariation](http://www.wiley.com/go/wiens/historicalenvironmentalvariation) [Disaster Risk Reduction for Resilience](#) Saeid Eslamian,Faezeh Eslamian,2022-09-30 This book is part of a six volume series on Disaster Risk Reduction and Resilience The series aims to fill in gaps in theory and practice in the Sendai Framework providing additional resources methodologies and communication strategies to enhance the plan for action and targets proposed by the Sendai Framework The series will appeal to a broad range of researchers academics students policy makers and practitioners in engineering environmental science and geography geoscience emergency management finance community adaptation atmospheric science and information technology This volume focuses on the concepts of economic and development vulnerability discussing the roles

of physical social cultural political economic technological and development factors that contribute to disaster impacts and threat levels on vulnerable populations This approach explores how the resilience of individuals and communities can be increased in the face of future hazard threats and how post disaster efforts are planned for and implemented to manage risk reduction and the potential outcomes of hazard threats Topics addressed in the boom include disaster recovery reform and resilience recovery and development programs place based reconstruction policies resilient and sustainable disaster relief and recovery programs sustainable community development and disaster recovery and post hazard recovery strategies

Renewing Local Planning to Face Climate Change in the Tropics Maurizio Tiepolo, Alessandro Pezzoli, Vieri Tarchiani, 2017-07-05 This book is open access under a CC BY 4.0 license This book aims to inspire decision makers and practitioners to change their approach to climate planning in the tropics through the application of modern technologies for characterizing local climate and tracking vulnerability and risk and using decision making tools Drawing on 16 case studies conducted mainly in the Caribbean Central America Western and Eastern Africa and South East Asia it is shown how successful integration of traditional and modern knowledge can enhance disaster risk reduction and adaptation to climate change in the tropics The case studies encompass both rural and urban settings and cover different scales rural communities cities and regions In addition the book looks to the future of planning by addressing topics of major importance including residual risk integration in local development plans damage insurance and the potential role of climate vulnerability reduction credits In many regions of the tropics climate planning is growing but has still very low quality This book identifies the weaknesses and proposes effective solutions

Governing Resources in a Changing Environment Mangku Purnomo, 2011 Until 1998 Indonesia was ruled by an authoritarian regime under which natural resources were exploited excessively so that resources governance was not appropriate anymore dealing with sustainability issue Throughout the contemporary reform process with the decentralization of power via local and regional autonomy natural resources are no longer dominated by direct state power only but also managed by more actors at various levels of society To employ the concepts of political ecology new institutionalism livelihood strategy and social sustainability the research showed that spatial production of Upland Bromo have always been dominated by state actors in order to establish the control over land and people In the other hand the contemporary environmental changes socially and physically coincidentally lessen the availability and productivity of the resources which in turn has affected the local people s

livelihoods leading to the increasing struggle for resources As a result three kinds of new local resources governance namely multi institutional relationship bilateral institutional relationship and personal relationship based resources governance are formed In association with the sustainability issue these new local resources governance was not really sustainable signalling by negative value in indicators analysed ability to develop sustainability bridge the sustainability and maintenance sustainability This research gives clear explanation that transformation of regime from authoritarian to democratic in developing countries do not always has significance impact in promoting sustainable resources governance
