The Problem with Education Technology (Hint: It's Not the Technology) Ben Fink, Robin Brown, 2016-02-01

Education is in crisis at least so we hear And at the center of this crisis is technology New technologies like computer based classroom instruction online K 12 schools MOOCs massive open online courses and automated essay scoring may be our last great hope or the greatest threat we have ever faced In The Problem with Education Technology Ben Fink and Robin Brown look behind the hype to explain the problems and potential of these technologies Focusing on the case of automated essay scoring they explain the technology how it works and what it does and doesn't do They explain its origins its evolution both in the classroom and in our culture and the controversy that surrounds it Most significantly they expose the real problem the complicity of teachers and curriculum builders in creating an education system so mechanical that machines can in fact often replace humans and how teachers students and other citizens can work together to solve it Offering a new perspective on the change that educators can hope organize and lobby for The Problem with Education Technology challenges teachers and activists on our side even as it provides new evidence to counter the profit making labor saving logics that drive the current push for technology in the classroom

Why They Can't Write John Warner, 2018-12-03 An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing There seems to be widespread agreement that when it comes to the writing skills of college students we are in the midst of a crisis In Why They Can't Write John Warner who taught writing at the college level for two decades argues that the problem isn't caused by a lack of rigor or smartphones or some generational character defect Instead he asserts we're teaching writing wrong Warner blames this on decades of educational reform rooted in standardization assessments and accountability We have done no more Warner argues than conditioned students to perform writing related simulations which pass temporary muster but do little to help students develop their writing abilities This style of teaching has made students passive and disengaged Worse yet it hasn't prepared them for writing in the college classroom Rather than making choices and thinking critically as writers must undergraduates simply follow the rules such as the five paragraph essay designed to help them pass these high stakes assessments In Why They Can't Write Warner has crafted both a diagnosis for what ails us and a blueprint for fixing a broken system Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education this book challenges readers to develop the skills attitudes knowledge and habits of mind of strong writers
