**QUESTION 1**

**(50)**

1.1 Compare and contrast the following international economics terms:

1.1.1 Marginal rate of substitution and marginal rate of technical substitution (4)

*Marginal Rate of Substitution (MRS):*

*The marginal rate of substitution measures the rate at which a consumer is willing to substitute one good for another while maintaining the same level of satisfaction. It represents the amount of one good a consumer is willing to give up to obtain an additional unit of another good. The MRS is based on the concept of diminishing marginal utility, which states that as a consumer consumes more of a good, the marginal utility derived from each additional unit decreases. The MRS is typically expressed as the ratio of the marginal utility of one good to the marginal utility of another good.*

*For example, let's say a consumer is consuming both apples and oranges. If the consumer is willing to give up two apples to obtain one additional orange and still remain equally satisfied, the MRS of apples for oranges would be 2:1. This means the consumer values an additional orange twice as much as two apples. ✓*

**Shadow Networks** Francisco Louçã, Michael Ash, 2018-10-03 The 2007 08 financial crisis surprised many economists and the public But how did the crisis come about why was it so deep and why has the clean up been so slow and painful Many accounts of the crisis focus on renegade activity in marginal financial sectors Shadow Networks challenges this pervading view and sets out to demonstrate that far from a dissident branch the shadow finance that initiated the crisis is tightly networked with and highly profitable for bank based finance The collapse was not an accident but baked into the system of finance from the start Shadow Networks traces the complex web of power that caused crisis and gives vivid descriptions of the actors in the quarter century leading up to 2007 to explain how the now decade long crisis took shape Shadow Networks Financial Disorder and the System that Caused Crisis is a probing examination of the roles of the powerful elite It traces the networks and institutions that support a finance focused market centered model of economy and society from their ascendancy to their surprising resilience in the face of manifest failures
