Capitalism Sven Beckert, 2015-11-25 A landmark event eight years in the making a brilliant global narrative that unravels the defining story of the past thousand years of human history Sven Beckert founder of Harvard's Program on the Study of Capitalism has made a profound impact on his field including his Bancroft Prize winning history Empire of Cotton That was merely base camp for the epic achievement of his new book Capitalism Beckert argues was born global Emerging from interconnected nodes in Asia Africa and Europe and at first dominated by Arab traders capitalism rooted itself gradually persisting for centuries as a vital but limited circulatory system that left most of the world's economic life untouched But then it burst onto the world scene as European states and merchants built a powerful alliance that propelled them across the oceans This Beckert shows was modern capitalism's big bang and its epicenter was the Caribbean Europeans violently transformed tropical islands into slave labor camps built with unparalleled efficiency and brutality to produce the world's most valuable commodities This system with its hierarchies that haunt us still provided the lift off for the even more radical transformations of the Industrial Revolution Empowered by vast productivity increases capitalism pulled down old ways of life and expanded its orbit ever further Gorging on coal and then oil it erased earlier traditions and crowned itself the defining force of the modern world This epic drama corresponded at no point to an idealized dream of free markets All along state backed institutions and imperial expansions shaped its dynamics never more than when the system reached its worst crack up ever in the two world wars and the Great Depression In the aftermath anti colonial rebellions

stripped capitalism of its European flavor to create the multipolar world we live in today Drawing on archives on five continents Capitalism decenters the European perspective locating important modes of agency resistance innovation and ruthless coercion everywhere in the world including India Japan Africa and the Americas through to the present with China's rise Beckert opens the aperture from heads of state to rural cultivators to show that constant struggle is at the core of the capitalist revolution Despite its dependence on expansion there always have been and are still areas of human life it has yet to reach By peeling back the layers of capitalism's global history Beckert exposes the truth of the system that to us now seems simply natural It is said that people can more easily imagine the end of the world than the end of capitalism If there is one ultimate lesson in this extraordinary book it's how to leave that behind Capitalism is nothing if not a human invention and so is the ideology that cloaks itself in a false timeless universality Sven Beckert doesn't merely tote up capitalism's debits and credits He shows us how to look through and beyond our reigning metaphor to imagine a larger world **Who's who Among Students in American Universities and Colleges** Henry Pettus Randall, 1974 *Middle East Economic Digest*, 2007 *Aviation Week & Space Technology*, 2009 Business Studies Cashius Julius Moshopya, 2020
