Directions: You and your partner will receive a set of translations of each of the excerpts from the Declaration of Independence listed below. Carefully read each translation and find the excerpt to which it best corresponds on the table below. When you think you have all eight complete have the teacher check your answers. When all eight are correct, copy the translation into the appropriate box.

Excerpt from the Declaration of Independence	What the Excerpt Means
Excerpt #1: "When in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the cause which impel them to the separation."	
Excerpt #2: "We hold these truths to be self-evident, that all men are created equal; that they are endowed with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness."	
Excerpt #3: "[T]o secure these [basic] rights, governments are instituted among men, deriving their just powers from the consent of the governed..."	
Excerpt #4: "[T]hat whenever any form of government becomes destructive [in protecting rights and responding to the people], it is the right of the people to alter or abolish it, and to institute a new government..."

**Opinion Dynamics and the Evolution of Social Power in Social Networks** Mengbin Ye, 2019-02-19 This book uses rigorous mathematical analysis to advance opinion dynamics models for social networks in three major directions First a novel model is proposed to capture how a discrepancy between an individual s private and expressed opinions can develop due to social pressures that arise in group situations or through extremists deliberately shaping public opinion Detailed theoretical analysis of the final opinion distribution is followed by use of the model to study Asch s seminal experiments on conformity

and the phenomenon of pluralistic ignorance Second the DeGroot Friedkin model for evolution of an individual's social power self confidence is developed in a number of directions The key result establishes that an individual's initial social power is forgotten exponentially fast even when the network changes over time eventually an individual's social power depends only on the changing network structure Last a model for the simultaneous discussion of multiple logically interdependent topics is proposed To ensure that a consensus across the opinions of all individuals is achieved it turns out that the interpersonal interactions must be weaker than an individual's introspective cognitive process for establishing logical consistency among the topics Otherwise the individual may experience cognitive overload and the opinion system becomes unstable Conclusions of interest to control engineers social scientists and researchers from other relevant disciplines are discussed throughout the thesis with support from both social science and control literature
