Reginald, 1985      **Calming Dr. Twitch-A-Lot** Evelyn Wolff, 2017-12-12 This story of deep wounding and subsequent healing bridges lifetimes Evelyn is born into a long line of Dutch Barons who through their greed to keep their land marry their cousins rarifying the genetics to produce genius and madness Evelyn is gifted with both an excess of grey matter and a very sensitive physiology and nervous system The uprooting of her family through immigration to Canada and the subsequent poverty and loss further take their toll though the family meets hardship with courage and

creativity The strain of failing health learning problems and gender complexities culminate in a near death experience Surprisingly after nearly dying Evelyn begins to recuperate Finishing high school she proceeds directly into Pre Meds and after mostly single parenting a baby through Medical school she graduates Following her heart to be with a woman results in the loss of her son This heartbreak is multiplied after she begins to work as a physician and realizes that the woman she loves does not want to live Evelyn invites you to follow her through a painful transformation causing a spiritual opening that births the artist in her This opening also leads her to remember past lives that allow her to see the workings of cause and effect while encouraging her to move forward revitalized into a whole new life

**Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

Knowing Subjects Barbara Simerka, 2013 In *Knowing Subjects* Barbara Simerka uses an emergent field of literary study cognitive cultural studies to delineate new ways of looking at early modern Spanish literature and to analyze cognition and social identity in Spain at the time Simerka analyzes works by Cervantes and Gracian as well as picaresque novels and comedias Employing an interdisciplinary approach she brings together several strands of cognitive theory and details the synergies among neurological anthropological and psychological discoveries that provide new insights into human cognition Her analysis draws on Theory of Mind the cognitive activity that enables humans to predict what others will do feel think and believe Theory of Mind looks at how primates including humans conceptualize the thoughts and rationales behind other people's actions and use those insights to negotiate social relationships This

capacity is a necessary precursor to a wide variety of human interactions both positive and negative from projecting and empathizing to lying and cheating Simerka applies this theory to texts involving courtship or social advancement activities in which deception is most prevalent and productive In the process she uncovers new insights into the comedia especially the courtship drama and several other genres of literature including the honor narrative the picaresque novel and the courtesy manual She studies the construction of gendered identity and patriarchal norms of cognition contrasting the perspectives of canonical male writers with those of recently recovered female authors such as Mar a de Zayas and Ana Caro She examines the construction of social class intellect and honesty and in a chapter on Don Quixote cultural norms for leisure reading at the time She shows how early modern Spanish literary forms reveal the relationship between an urbanizing culture unstable subject positions and hierarchies and social anxieties about cognition and cultural transformation *Foundation* ,2002
