

Intro to Science and Macromolecules

There isn't one way to design an experiment! However, this is the normal sequence:

1. Ask a question
2. Conduct background research
3. Construct a hypothesis
4. Test your hypothesis in an experiment
5. Analyze data
6. Draw conclusions and communicate them

Independent Variable: what the experimenter will deliberately change or manipulate in the investigation

- Usually on the x-axis of a graph

Dependent Variable: what changes in response to the independent variable

- On the y-axis of a graph
- what is measured

Experimental Group: group that is being experimented on. The group where you change the IV

Control Group: group used for comparison with your experimental groups. This is the "normal" group.

Constants: the aspects of an experiment that are held the same

Controlled for: difference measured in the DV is caused only by the IV

Characteristics of life:

1. Made of cells
2. Have DNA/RNA
3. Reproduce
4. Use energy
5. Maintain Homeostasis
6. Respond to stimuli
7. Grow/develop
8. Evolve (as a population)

Basic Chemistry:

Reactants: what you start with

Products: what you make

Protons: positive charge

Neutrons: no charge

Electrons: negative charge

Polar molecule: unequal sharing of electrons (one side is positive other side is negative)

Hydrophilic: loves water

because it is polar

Hydrophobic: hates water

because it is nonpolar

Main elements in living things:

CHNOPS: carbon, hydrogen,

nitrogen, oxygen, phosphorus,

sulfur, in that order

Tintinalli's Emergency Medicine is THE essential resource for everyone working in and teaching emergency medicine. The Ninth Edition provides the depth and breadth of coverage that reflects the complexity and expertise needed to practice emergency medicine in today's fast-paced environments. This comprehensive text is an important clinical resource for physicians, residents, and students, advanced practice providers, emergency nurses, EMTs, and paramedics. It is a necessary resource for in-training and board examinations and recertification. Tintinalli's Emergency Medicine covers everything from prehospital care, disaster preparedness, and basic and advanced resuscitative techniques to all the significant medical, traumatic, and environmental conditions requiring emergency treatment in adults, children, and neonates.

Highlights of the Ninth Edition:

- Full color design with more tables than ever to succinctly present key information.
- Extensive updates to all sections incorporating the latest clinical and evidence-based information.
- Online access to over 100 videos covering a wide range of diagnostic and therapeutic procedures and POCUS for obstetric, gynecologic, pediatric, musculoskeletal, and vascular conditions.
- World-class pediatric section on the care of neonates, infants, and children.
- Expanded chapters on the management of gynecologic and obstetric conditions and emergencies.
- Updated information on toxicologic and environmental emergencies.
- Contemporary, concise discussion of ED identification and treatment of opioid use disorders.
- Updated information on procedural sedation.
- Expert advice on the management and care of transgender patients.
- Latest information available on neurologic and cardiac emergencies.

From the reviews of the seventh edition: Collectively, they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last, for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks, available in my opinion, Tintinalli's still comes out on top. It is more concise and easier to read than some, yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did, the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come.
