Les Acircmes Affines:

The Decomposition and Classification of Radiant Affine 3-Manifolds Suhyoung Choi, 2001 An affine manifold is a manifold with torsion free flat affine connection a geometric topologist would define it as a manifold with an atlas of charts to the affine space with affine transition functions This title is an in depth examination of the decomposition and classification of radiant affine 3 manifolds affine manifolds of the type that have a holonomy group consisting of affine transformations fixing a common fixed point

History of Topology I.M. James, 1999-08-24 Topology for many years has been one of the most exciting and influential fields of research in modern mathematics Although its origins may be traced back several hundred years it was Poincaré who gave topology wings in a classic series of articles published around the turn of the century While the earlier history sometimes called the prehistory is also considered this volume is mainly concerned with the more recent history of topology from Poincaré onwards As will be seen from the list of contents the articles cover a wide range of topics Some are more technical than others but the reader without a great deal of technical knowledge should still find most of the articles accessible Some are written by professional historians of mathematics others by historically minded mathematicians who tend to have a different viewpoint
