Marshall, 2025-10-01 Contesting Cultural Rhetorics is a groundbreaking and original study that demonstrates how education is viewed as a contested term and a set of contested practices in American culture because it is inevitably linked to highly contested value laden terms An examination of the public discourse of education not only reveals the ideologies and conceptions embedded in educative acts and institutions but also provides a means of examining how education itself functions in American culture as a site of contest between ideologies values and the constitution of individual and nation Margaret J Marshall's analysis employs a range of contemporary theorists from Bakhtin to Foucault and draws on a number of disciplinary perspectives including law history and ethnography where

scholars have been examining discursive practices and where rhetoric is understood to be a means of examining cultural conceptions and embedded ideologies Through these lenses she examines four influential and popular texts of the 1890s that serve to illuminate current public debates on education Joseph Mayer Rice s articles in Forum a well respected magazine Matthew Arnold s introduction to a government report W E B Du Bois s A Negro Schoolmaster in the New South and Jane Addams s A Function of the Social Settlement Neither a history of education nor a typical literary analysis of the texts in question this book considers the rhetorical stance of authors the constitution of audience and subject and the use of references and narratives as devices of authority Taken together these texts reveal the complicated public discussion of education in the 1890s a period of transformation in culture schooling and the organization of knowledge Moreover they reveal the rhetorical structure of many of the questions Americans ask about education today who should be educated by whom for what purposes using what methods or materials What of the past should we pass on to the future and how Contesting Cultural Rhetorics will be useful to readers interested in the history of education and nineteenth century popular culture as well as those involved in current debates on education and public policy
