is to establish the co operative communication strategies that are used in air traffic control ATC conversations The research  
deals with the question what kind of co operative communication strategies do pilots and controllers employ in a speech  
situation with a restricted use of vocabulary which generally does not permit any deviations from standard phraseology The  
strategies in ATC speech are then compared to those used by second language learners Faerch and Kasper s 1983 taxonomy  
of communication strategies will serve as a basis for this comparison The author analyses authentic speech samples from  
various ATC workstations at Zurich Airport and evaluates various aspects of phraseology training of air traffic controllers
