Recent Advances in Electrical Engineering and Control Applications Mohammed Chadli, Sofiane Bououden, Ivan Zelinka, 2016-12-01 This book of proceedings includes papers presenting the state of art in electrical engineering and control theory as well as their applications The topics focus on classical as well as modern methods for modeling control identification and simulation of complex systems with applications in science and engineering The papers were selected from the hottest topic areas such as control and systems engineering renewable energy faults diagnosis faults tolerant control large scale systems fractional order systems unconventional algorithms in control engineering signals and communications The control and design of complex systems dynamics analysis and modeling of its behavior and structure is vitally important in engineering economics and in science generally science today Examples of such systems can be seen in the world around us and are a part of our everyday life Application of modern methods for control electronics signal processing and more can be found in our mobile phones car engines home devices like washing machines is as well as in such advanced devices as space probes and systems for communicating with them All these technologies are part of technological backbone of our civilization making further research and hi tech applications essential The rich variety of contributions appeals to a wide audience including researchers students and academics Proceedings of the NIELIT's International Conference on

Communication, Electronics and Digital Technology Palaiahnakote Shivakumara, Saurov Mahanta, Yumnam Jayanta Singh, 2024-07-22 The book presents selected papers from NIELIT s International Conference on Communication Electronics and Digital Technology NICEDT 2024 held during 16 17 February 2024 in Guwahati India The book is organized in two volumes and covers state of the art research insights on artificial intelligence machine learning big data data analytics cybersecurity and forensic network and mobile security advance computing cloud computing quantum computing VLSI and semiconductors electronics system Internet of Things robotics and automations blockchain and software technology digital technologies for future and assistive technology for Divyangjan people with disabilities **Sustainable Electrical**

Engineering and Intelligent Systems Birudala Venkatesh Reddy, Y V Krishna Reddy, Md. Abdur Razzak, Surender Reddy Salkuti, 2025-09-10 This book comprises a selection of papers presented at the International Conference of Sustainable Electrical Engineering and Intelligent Systems ICSEEIS 2025 It presents a rich repository of groundbreaking research at the intersection of artificial intelligence and electrical engineering for a sustainable future The papers in this collection touch upon a wide array of topics including developments in smart grid technologies machine learning applications for power system optimization and the integration of renewable energy This volume also provides an in depth analysis of intelligent control systems energy efficiency and the use of AI to solve the problems of sustainable energy management Readers can expect to find the latest advances in fault detection predictive maintenance and the creation of strong and resilient electrical infrastructure in this book The findings would be instrumental in fostering a deeper understanding of intelligent and

sustainable electrical systems and building a firm knowledge base for further innovation This is a valuable resource for researchers engineers and professionals in the field of computer science and electrical engineering It offers state of the art research and useful solutions to those interested in creating and putting into practice intelligent and sustainable energy solutions

Progress in Artificial Intelligence Luis Miguel Correia,Luís Paulo Reis,José Manuel Cascalho,2013-09-04 This book constitutes the refereed proceedings of the 16th Portuguese Conference on Artificial Intelligence EPIA 2013 held in Angra do Hero smo Azores Portugal in September 2013 The 45 revised full papers presented were carefully reviewed and selected from a total of 157 submissions The papers are organized in the following topical sections ambient intelligence and affective environments artificial intelligence in transportation systems artificial life and evolutionary algorithms computational methods in bioinformatics and systems biology general artificial intelligence intelligent robotics knowledge discovery and business intelligence multi agent systems theory and applications social simulation and modeling and text mining and applications

Federal Register ,1993-02-23 *ICESC 2019* Julius Tanesab ,Adrianus Amheka,Butje Fanggi,2019-10-18 We are delighted to introduce the proceedings of the 1st International Conference on Engineering Science and Commerce ICESC 2019 Tourism is one of the fastest growing industries and contributes a great deal to economies around the world However it is inevitable that activities in the development of the tourism industry have caused many problems both in local culture and the environment What is the role of Engineering Science and Commerce to support Sustainable Tourism This conference has brought researchers academicians and practitioners to contribute to the body of knowledge and practical problem solving from the field of engineering science and technology that are relevant to support sustainable tourism Engineering papers focused on the role of renewable energy information technology civil and mechanical engineering researches that support sustainable tourism In the field of science the papers discussed achievements of the latest technology in finding environmentally friendly products The role of business and accounting systems to support the sustainable tourism was indicated by more than 20 papers We hope that the proceedings will be an exceptional source for readers who concern to the impacts of the development of tourism on natural resources consumption patterns pollution and social systems
