CHECKING

The checking of the various pins is done with the connector removed from the control unit. Under no circumstances should the test leads of the voltmeter be inserted into the groups of the connector's terminals.

It is therefore necessary to remove the connector protective cover to make the various checks on the wire side of the terminals.

Once the cover is removed, the pin numbers from 1 to 25 will become apparent.

Preliminary Conditions for these checks:

- Voltage: Fully charged battery
- Grounds: Battery disconnected
