which not just public health authorities but every sector of society is engaged in constant fat talk aimed at educating badgering and ridiculing heavy people into shedding pounds We hear a great deal about the dangers of fatness to the nation but little about the dangers of today s epidemic of fat talk to individuals and society at large The human trauma caused by the war on fat is disturbing and it is virtually unknown How do those who do not fit the ideal body type feel being the object of abuse discrimination and even revulsion How do people feel being told they are a burden on the healthcare system for having a BMI outside what is deemed with little solid scientific evidence healthy How do young people already prone to self doubt about their bodies withstand the daily assault on their body type and sense of self worth In *Fat Talk Nation* Susan Greenhalgh tells the story of today s fight against excess pounds by giving young people the campaign s main target an opportunity to speak about experiences that have long lain hidden in silence and shame Featuring forty five autobiographical narratives of personal struggles with diet weight bad BMIs and eating disorders *Fat Talk Nation* shows how the war on fat has produced a generation of young people who are obsessed with their bodies and whose most fundamental sense of self comes from their size It reveals that regardless of their weight many people feel miserable about their bodies and almost no one is able to lose weight and keep it off Greenhalgh argues that attempts to rescue America from obesity induced national decline are damaging the bodily and emotional health of young people and disrupting families and intimate relationships Fatness today is not primarily about health Greenhalgh asserts more fundamentally it is about morality and political inclusion exclusion or citizenship To unpack the complexity of fat politics today Greenhalgh introduces a cluster of terms biocitizen biomyth biopedagogy bioabuse biocop and fat personhood and shows how they work together to produce such deep investments in the attainment of the thin fit body These concepts which constitute a theory of the workings of our biocitizenship culture offer powerful tools for understanding how obesity has come to remake who we are as a nation and how we might work to reverse course for the next generation **New Scientist** ,2009 *Philosophy of Music Education Review* ,2014 Quill & Quire ,2009 **The British National Bibliography** Arthur James Wells,2009 **Choice** ,2009 **The Writers Directory** ,2013 **Let Them Eat Promises** Nick Kotz,1969 Weighing In Julie Guthman,2011-10-06 A bold compelling challenge to conventional thinking about obesity and its fixes *Weighing In* is one of the most important books on food politics to hit the shelves in a long time Susanne Freidberg author of *Fresh A Perishable History* *Weighing In* is filled with counterintuitive surprises that should make us skeptics of all kinds of food whether local fast slow junk or health but also gives us the practical tools to effectively scrutinize the stale buffet of popularly accepted health wisdom before we digest it Paul Robbins professor of Geography and Development University of Arizona If you liked Michael Pollan this should be your next read Guthman gives us the research behind the questions we should be asking but falling all over ourselves in the rush to consensus we have overlooked A self described Berkeley foodie Guthman takes on the self satisfaction of the alternative food movement and places it in rich context drawing on research in health economics labor agriculture sociology and politics

This marvelous surprising book is a true game changer in our national conversation about food and justice Anna Kirkland author of *Fat Rights Dilemmas of Difference and Personhood* This groundbreaking book calls into question the ubiquitous claim that good food will solve the social and health dilemmas of today Combining political economic analysis cultural critique and clear explanation of scientific discoveries the author challenges our deeply held convictions about society food bodies and environments Becky Mansfield editor of *Privatization Property and the Remaking of Nature Society Relations* Step back from that farmer s market Guthman shows us that good foods and good eating are not enough By questioning the fuzzy facts on obesity the impact of environment and capitalism s relentless push to consume *Weighing In* challenges us to think harder and better about what it really takes to be healthy in the modern age Carolyn de la Pe a author of *Empty Pleasures The Story of Artificial Sweetener from Saccharin to Splenda*
