thorough look at this turning point WWII aerial battle with eyewitness accounts maps and rare photos incredibly well researched Aircrew Book Review By late summer 1940 Nazi Germany had conquered all its opponents on the continent including the British Army itself which was forced to scramble back aboard small boats to its shores A non aggression pact with the Soviet Union in hand Hitler had only one remaining object that season the British Isles themselves However before he could invade his Luftwaffe needed to wipe the Royal Air Force from the skies History s first strategic military campaign conducted in the air alone was about to take place This book contains a large number of dramatic eyewitness accounts even as it reveals new facts that will alter common perceptions of the battle For example the twin engined Messerschmitt Bf 110 was actually a good day fighter and it performed at least as well in this role as the Bf 109 during the battle The Luftwaffe s commander Hermann G ring performed far better than has been believed The British night bombers played a more decisive role than previously thought in addition this book disproves that the German 109 pilots were in any way superior to their Hurricane or Spitfire counterparts The author has examined records from both sides and provides surprising statistics that shatter much conventional wisdom laying out the Battle of Britain as seldom seen before Includes color photos of the relevant aircraft
