through the creation of the National Civil Aviation Agency ANAC by the Federal Law No 11 182 of 2005 its military past still influences the current regime and air traffic control remains part of the Ministry of Defence Understanding the various agencies in charge of civil aviation and laws governing important aspects of this area is essential consequently this book discusses the laws applicable to competition consumers airport and aircraft operation safety and accident investigations and environmental concerns Written in a format to meet the needs of lawyers academics and aviation professionals the book explains the key concepts and laws applicable to aviation in Brazil Each chapter explores an essential area of aviation law to present readers with an insider s understanding of the whole system to facilitate business relations with Brazil
