A Theory of Insurance and Gambling John A. Nyman, 2024 This book holds that the demand for insurance is best understood not by focusing on risk preferences but by focusing on the additional income the states of the world that trigger the income transfer from the insurer and the value of income and consumption in those states It is unlikely that demand can be understood if the analyst limits the gain from insurance to coverage of the uninsured loss alone It is also unlikely that the demand can be understood if the analyst limits the analysis to a movement along a static risk averse utility or value function rather than acknowledging that a

shift of this function and thus in the utility or value of additional income often coincides with the occurrence of the event that triggers the payout
