Oceanography and Coastal Informatics: Breakthroughs in Research and Practice Management Association, Information Resources, 2018-11-02 To date a vast amount of the world's oceans remains uncharted. With water covering more than 70 percent of the Earth's surface, maritime and oceanographic exploration and research is vital. *Oceanography and Coastal Informatics: Breakthroughs in Research and Practice* is a critical source of academic knowledge centered on technologies, methodologies, and practices related to the biological and physical aspects of the ocean and coastal environments. This publication is divided into four sections: climate change and environmental concerns; data analysis and management; fisheries management and ecology; and GIS geospatial analysis and localization. This publication is an ideal reference source for oceanographers, marine and maritime professionals, researchers, and scholars interested in current research on various aspects of oceanography and coastal informatics.

Geoenvironmental Practices and Sustainability G.L. Sivakumar Babu, Krishna R. Reddy, Anirban De, Manoj Datta, 2017-06-05 This volume is a compilation on issues related to sustainable practices in geo-environmental engineering, particularly as applying to developing nations such as India. While the developed world has already developed some solutions such as landfills, developments in landfills, barriers, and liners in North America, and waste-to-energy and waste incineration in Europe, developing countries like India are trying to figure out ways which suit the present condition without compromising the future needs and comforts. This volume presents case studies on the various problems and solutions adopted for different sites. Although a common approach for all the problems is not feasible, or recommend this collection aims to provide a compendium on the current efforts underway and to help achieve common ground for the practitioners and researchers involved. The works included here give insight to the possible development of resilient and sustainable structures like offshore wind turbines and energy geotechnics. The book covers topics such as liners and barrier systems, use of recycled and waste materials, waste management, and hazard assessment, sustainable infrastructure, and sustainability and the environment. The contents of this book will be useful to researchers and professionals working in geo-environmental engineering. The book will also be useful to policy makers interested in understanding geotechnical concerns related to sustainable development.

Good practices for integrating gender equality and women's empowerment in climate-smart agriculture programmes Food and Agriculture Organization of the United Nations, 2019-05-31 This guidance, entitled *Integrating Gender Equality and Women's Empowerment in CSA Programs*, focuses on a set of agricultural practices to be implemented by small-scale food producers in developing countries. The purpose of this document is to provide agriculture development practitioners and policy makers globally with guidance, tools, and examples of successful integration of gender equality and women's empowerment (GEWE) into climate-smart agriculture (CSA) work by demonstrating the necessity and benefits of incorporating a GEWE approach in

CSA work and presenting tested strategies for enhancing the engagement of women and particularly vulnerable groups in CSA work With a view towards accelerating the impacts of country programs FAO and CARE have partnered to develop this guidance to help policy makers and practitioners meet the ambitious goals of the SDGs and the 2030 Agenda *Design of Water Resource Recovery Facilities, Manual of Practice No.8, Sixth Edition* Water Environment Federation,2017-09-29 Complete Coverage of the State of the Art in Water Resource Recovery Facility Design Featuring contributions from hundreds of wastewater engineering experts this fully updated guide presents the latest in facility planning configuration and design Design of Water Resource Recovery Facilities WEF Manual of Practice No 8 and ASCE Manuals and Reports on Engineering Practice No 76 Sixth Edition covers key technical advances in wastewater treatment including Advances with membrane bioreactors applications Advancements within integrated fixed film activated sludge IFAS systems and moving bed biological reactors systems Biotrickling filtration for odor control Increased use of ballasted flocculation Enhanced nutrient control systems Sidestream nutrient removal to reduce the loading on the main nutrient removal process Use and application of wireless instrumentation Use and application of modeling wastewater treatment processes for the basis of design and evaluations of alternatives Process design and disinfection practices to minimize generation of TTHMs and other organics monitored for potable water quality Approaches to minimizing biosolids production and advances in biosolids handling including effective thermal hydrolysis and improvements in sludge thickening and dewatering technologies Increasing goals toward energy neutrality and driving net zero Trend toward resource recovery *Rewilding in Practice* Ian Convery,Steve Carver,Monica T. Engel,Sally Hawkins,Rene Beyers,Yue Cao,2025-03-03 Rewilding is a long term and large scale process which works to restore degraded ecosystems or social ecological systems to the point that they are resilient and self sustaining and therefore requiring little in terms of conservation management Rewilding practice focuses on re establishing ecological processes including trophic levels that were lost mainly due to anthropogenic disturbance It also aims to affect a paradigm shift in human nature relationships with intentions to better understand the interdependencies between humans and nature so that people can appreciate and accommodate nature in their landscapes and make more informed and sustainable decisions about how we live In this sense rewilding has real transformational potential **Phenomenology in Adaptation Planning** Hendricus Andy Simarmata,2017-08-23 This book explores the planning knowledge that can be gleaned from the experiences of the urban poor a group frequently affected by floods Further it examines the relationship between lifeworld analysis and adaptation planning through the sociology of knowledge which plays a significant part in determining the adaptation pathway of the urban poor The book brings together empirical data to translate self reflective planning theory into the practical context examines community planning and enriches the discourse on urban adaptation Lastly it provides an adaptation planning model that can benefit academics practitioners and policymakers who wish to provide more socially accepted plans **ICE Manual of Geotechnical Engineering Volume 1** Hilary Skinner,D G

Green Savings Marilyn A. Brown, Yu Wang, 2015-09-29 This landmark work lauds the benefits of decreased energy consumption investigating its relationship to public policy and analyzing its potential billion dollar benefits to the U S economy U S consumers tend to use energy indiscriminately something they may no longer be able to do with impunity This game changing book asserts that reducing energy consumption should be a frontline strategy to address global climate change threats to energy security and the challenge of grid reliability The book supports two bold arguments that policies motivating greater investment in high energy efficiency should be a priority and that energy efficiency can help the nation in times of crisis To make their case for the necessity of prioritizing demand reduction the authors examine the policies and markets operating in a number of leading cities states and nations across the globe to uncover the keys to their success These examples show how demand side strategies can significantly reduce pollution cut costs and make the electric grid more resilient The authors explain why these technologies are not widely adopted and assess the potential savings they can produce The book will be an eye opener for policymakers energy professionals and the public as it demonstrates how cost effective demand reduction policies can improve air quality strengthen electricity markets and generate jobs

Drawing Down N₂O to Protect Climate and the Ozone Layer, 2013 This report addresses the benefits of drawing down nitrous oxide N₂O emissions N₂O is now the most significant ozone depleting substance emission and the third most important greenhouse gas released into the atmosphere Global anthropogenic N₂O emissions are rapidly increasing and are expected to almost double by 2050 unless mitigation action is accelerated The

continued build up of N₂O in the atmosphere will continue to deplete the stratospheric ozone layer and in so doing will to a degree undermine the achievements of the Montreal Protocol The build up of N₂O will also make it more difficult to achieve climate targets Two thirds of current anthropogenic N₂O emissions originate from agriculture and these can be reduced by boosting nitrogen use efficiency especially by making the use of fertilizer manure and feed more efficient Improving nitrogen use efficiency can be accomplished through a wide variety of feasible options *Forest Systems* ,2014 Ghana's Second National Communication to the UNFCCC, 2011 ,2011 OPEC Bulletin ,2013
