## Isizulu Fal 2013:

**The Oxford Guide to the Bantu Languages** Lutz Marten, Ellen Hurst-Harosh, Nancy C. Kula, Jochen Zeller, 2025 This volume brings together leading scholars from the African continent and beyond to provide a detailed account of the languages of the Bantu family The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly *South African Schooling: The Enigma of Inequality* Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI *Global Perspective on Issues and Trends in Educational Translanguaging* Bautista, Jude Cañero, Kim, Jean, 2025-05-29 The growing superdiversity around the world now appears to be the norm In traditional English speaking inner circle nations it is becoming increasingly rare to find classrooms with students who come from monocultural and monolingual backgrounds However teaching practices remain based on Anglocentric standards and perspectives even when most of the English speakers in the world are no longer just the

monolingual speakers of the language Research in bilingualism and multilingualism reverberate the potential of translanguaging as a pedagogical practice This is to leverage all the linguistic cultural and semiotic resources of learners so that they can actively engage in the language literacy and content area learning processes in the classroom However even though it has gained ground in theory and research it has not been upheld in instructional practice especially in the Anglophone nations While some regions view translanguaging as a pathway to educational justice others face barriers such as limited resources administrative constraints or lack of teacher training Despite its promise concerns remain around the selective use of languages and the risk of reinforcing existing linguistic hierarchies Global Perspective on Issues and Trends in Educational Translanguaging explores translanguaging pedagogies from both monolingual English speaking contexts and multilingual and multicultural contexts It examines a monolingual multilingual pairing of theoretical research and practical perspectives from around the world assessing how translanguaging pedagogies are practiced and researched worldwide This book covers topics such as indigenous studies migrant learners and pedagogy and is a useful resource for educators language experts academicians researchers and scientists

Revitalizing Minority Voices Renée DePalma, Diane Brook Napier, Willibroad Dze-Ngwa, 2015-10-13 Whose voices are taken into account in language policy and planning and whose have been ignored or more actively silenced This is the central question addressed in this book What are the political and social factors that have helped to create these historical exclusions in terms of endangerment and loss of traditional languages What are the global influences on the local landscape of languages and linguistic rights What are the implications for cultural heritage and identity In analyzing these questions and reporting on research in an array of countries the chapter authors also suggest ways forward toward designing more inclusive policies and practices in educational contexts whether in the context of obligatory schooling or in less formal educational contexts UNESCO estimates that at least 43% of the estimated 6000 languages spoken in the world are endangered Such statistics remind us that the linguistic diversity that characterizes the human condition is a fragile thing and that certain languages need to be cultivated if they are to survive into the 21st century and beyond The chapters in this volume originated as presentations at the XV World Congress of Comparative Education Societies Buenos Aires Argentina 2013 They represent several global regions namely Africa Asia Europe and North America They provide analyses of language policy and politics at the local regional national and transnational levels grass roots linguistic revitalization initiatives and the attitudes of minority and majority speakers toward minoritized languages and cultures and towards intercultural and multilingual education programs div
