Isr Installation Status Report:

Installation Status Report Part I - Infrastructure Field Test After Action Report Military academy west point ny, 1993 Part I Infrastructure of the Installation Status Report ISR was field tested at 11 CONUS installations in July August 1993 The test was very successful in identifying the strengths and weaknesses of the ISR as a decision support system The test results have been briefed to all levels of the Army leadership to include the CSA General Sullivan was enthusiastic about the potential of the ISR as a Commander s tool to assist infrastructure related decisions made at all levels of the Army He approved a plan to retest Part I in Feb Apr 94 at the original test sites along with some additional installations to validate the system improvements made since the First test Part II Environment will also be tested during this time frame at these same installations The test installations validated the ISR in meeting its design objectives for their use MACOM response to the ISR was mixed Generally the MACOMs supported testing the ISR further to validate the cost factors and C Rating algorithms prior to using data in the budgeting process They support further testing also to validate improved facility standards and to identify efficient uses of the data at MACOM and DA level This report presents summaries of much of the ISR test data This test data should not be used in decision making and presentations of it in this report are clearly marked as For Test Purposes Only Cost factors C Rating algorithms facility requirements and assets data and facility standards from which this data was generated are all being refined to improve the overall ISR system Test results support that this data will be very useful to decision makers however the accuracy of the test data is questionable until system enhancements are completed

Installation Status Report Part I - Infrastructure Part II-Environment Expanded Field Test After Action Report, 1995 Results of the initial field test of Part I Infrastructure of the ISR were briefed to the Army leadership in the 1st quarter of FY94 These briefings culminated in the CSA directing an expanded field test of Part I Infrastructure and an initial field test of Part II Environment When briefed on the results of this expanded field test the Chief of Staff Army approved CONUS implementation of the ISR Part I Infrastructure for 3rd quarter FY95 The CSA directed OASA FM and ORCEN to do more work on Part II before it is implemented Army wide The ISR development team received feedback from test installations by conducting in progress assistance and validation visits to 24 of the 25 test sites through feedback surveys completed by installation commanders and ISR action officers and through post test teleconference after action reviews Some of the key learning points from this feedback were 1 Installation Commanders gave strong support to the idea of using C ratings to describe infrastructure The current ISR area structure is adequate to cover the major types of infrastructure found on most posts 2 Installation commanders and action officers do not feel very confident in the costing or resource aspects of the ISR 3 Both the 03 Directorate of Plans and Training and the Directorate of Public works DPW office are the main activities used as an installation s lead ISR office 4 The inspection process is most efficiently completed using both centralized teams for common facilities e g installation utility systems and individual facility users 5 The facility requirements and assets data edit
