Francis Watkins and the Dollond Telescope Patent Controversy Brian Gee, edited by Anita McConnell, 2016-04-15 Francis
Watkins was an eminent figure in his field of mathematical and optical instrument making in mid eighteenth century London
Working from original documents Brian Gee has uncovered the life and times of an optical instrument maker who at first
glance was not among the most prominent in his field In fact because Francis Watkins came from a landed background the
diversification of his assets enabled him to weather particular business storms discussed in this book where colleagues
without such an economic cushion were pushed into bankruptcy or forced to emigrate He played an important role in one of
the most significant legal cases to touch this profession namely the patenting of the achromatic lens in telescopes The book
explains Watkins s origins and how and why he was drawn into partnership with the famous Dollond firm who at that point
were Huguenot incomers The patent for the achromatic telescope has never been satisfactorily explained in the literature
and the author has gone back to the original legal documents never before consulted He teases out the problems lays out the
evidence and comes to some interesting new conclusions showing the Dollonds as hard headed and ruthless businessmen
ultimately extremely successful The latter part of the book accounts for the successors of Francis Watkins and their decline
after over a century of successful business in central London *The Reference Catalogue of Current Literature* , 1893 **A**
