College Entrance Examination Board, 1979 **College Choices of Academically Able Students** Randall G. Chapman, Rex Jackson, 1987 College preferences and choices of a sample of high ability high school seniors applying to colleges in spring 1984 were studied to determine the award of no need merit aid to the students and the degree to which such aid influences college choices in relation to other factors A multistage model of college choice behavior was employed that focuses on perception formation preference judgment formation and choice The study is based on a national probability sample of 2 000 high ability high school seniors who had taken the College Board's Scholastic Aptitude Test SAT Students were contacted before and after the actual college choice decision A total of 1 183 students who had applied to at least two colleges were surveyed by mail and interviewed Sixty four percent of these students received at least one offer of financial aid Results indicate that most colleges consider a student's academic ability in determining whether a student receives financial aid and the size of the aid package Monetary factors were important to college choice however the primary determinant of college choice was perceived college quality Appendices include information on the multinomial logit model the mail questionnaire and the interview schedule SW School-college Collaboration Nancy Carriuolo, 1996 **Encyclopedia of Educational Reform and Dissent** Thomas C.
