demonstrating practical application of theories activities to further understanding and reflection questions to guide learning New in this edition are Concepts to consider which provide a guided explanation and further discussion of key concepts to support pre and in service teachers learning and teaching of the fundamentals of mathematics Diversity in Mathematics Education Alan Bishop,Hazel Tan,Tasos N Barkatsas,2014-09-20 This book presents a research focus on diversity and inclusivity in mathematics education The challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is often argued to require differentiation as a response Typically different curricula text materials task structures or pedagogies are favoured responses but huge differences in achievement still result If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education The book is written by a group of experienced collaborating researchers who share this focus It is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity Several chapters report new research in this direction The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne Australia The chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive approaches The studies presented are set in different contexts including Australia China the United States and Singapore **The Proceedings of the 12th International Congress on Mathematical Education** Sung Je Cho,2015-02-10 This book comprises the Proceedings of the 12th International Congress on Mathematical Education ICME 12 which was held at COEX in Seoul Korea from July 8th to 15th 2012 ICME 12 brought together 3500 experts from 92 countries working to understand all of the intellectual and attitudinal challenges in the subject of mathematics education as a multidisciplinary research and practice This work aims to serve as a platform for deeper more sensitive and more collaborative involvement of all major contributors towards educational improvement and in research on the nature of teaching and learning in mathematics education It introduces the major activities of ICME 12 which have successfully contributed to the sustainable development of mathematics education across the world The program provides food for thought and inspiration for practice for everyone with an interest in mathematics education and makes an essential reference for teacher educators curriculum developers and researchers in mathematics education The work includes the texts of the four plenary lectures and three plenary panels and reports of three survey groups five National presentations the abstracts of fifty one Regular lectures reports of thirty seven Topic Study Groups and seventeen Discussion Groups Asian Migration and Education Cultures in the Anglosphere Megan Watkins,Christina Ho,Rose Butler,2019-03-27 Asian migration and mobilities are transforming education cultures in the Anglosphere prompting mounting debates about tiger mothers and dragon children and competition and segregation in Anglosphere schools This book challenges the cultural essentialism

which prevails in much academic and popular discussion of Asian success and in relation to Asian education mobilities. As anxiety and aspiration within these spaces are increasingly ethnicised, the children of Asian migrants are both admired and resented for their educational success. This book explores popular perceptions of Asian migrant families through in-depth empirically informed accounts on the broader economic, social, historical and geo-political contexts within which education cultures are produced. This includes contributions from academics on global markets and national policies around migration and education, classed trajectories and articulations, local formations of ethnic capital and transnational assemblages that produce education and mobility as means for social advancement. At a time when our schooling systems and communities are undergoing rapid transformations as a result of increasing global mobility, this book is a unique and important contribution to an issue of pressing significance. This book was originally published as a special issue of the *Journal of Ethnic and Migration Studies*.
