,2004 *The Columbia Accident Investigation Board Report* United States Columbia Accident Investigation Board,2003

Columbia Accident Investigation Board. Volume One National Aeronautics and Space Administration (NASA),2018-08-20

The Columbia Accident Investigation Board's independent investigation into the February 1 2003 loss of the Space Shuttle Columbia and its seven member crew lasted nearly seven months. A staff of more than 120 along with some 400 NASA engineers supported the Board's 13 members. Investigators examined more than 30 000 documents conducted more than 200 formal interviews heard testimony from dozens of expert witnesses and reviewed more than 3 000 inputs from the general public. In addition more than 25 000 searchers combed vast stretches of the Western United States to retrieve the spacecraft's debris. In the process Columbia's tragedy was compounded when two debris searchers with the U S Forest Service perished in a helicopter accident. This report concludes with recommendations some of which are specifically identified and prefaced as before return to flight. These recommendations are largely related to the physical cause of the accident and include preventing the loss of foam improved imaging of the Space Shuttle stack from liftoff through separation of the External Tank and on orbit inspection and repair of the Thermal Protection System. The remaining recommendations for the most part stem from the Board's findings on organizational cause factors. While they are not before return to flight recommendations they can be viewed as continuing to fly recommendations as they capture the Board's thinking on what changes are necessary to operate the Shuttle and future spacecraft safely in the mid to long term. These recommendations reflect both the Board's strong support for return to flight at the earliest date consistent with the overriding objective of safety and the Board's conviction that operation of the Space Shuttle and all human space flight is a developmental activity with high inherent risks.
