Issues In Second Language Proficiency:

Issues in Second Language Proficiency Alessandro G. Benati, 2011-10-27 Benati provides clarity about the characteristics and notion of language proficiency in the field of second language acquisition. He looks at four areas of research paradigmatically related to the role of proficiency: theorizing and measuring second language proficiency, the dimensions of L2 proficiency, factors contributing to the attainment of L2 proficiency, and attaining L2 proficiency in the classroom. It also contains a variety of research accounts about the specific factors which have an effect on proficiency together with a theorised measurement of proficiency in second language research. It will be required reading for researchers in applied linguistics and second language acquisition.

Conducting Second-Language Reading Research Elizabeth B. Bernhardt, Michael L. Kamil, 2022-05-24 This is the first hands-on methods guide for second language L2 reading research. The authors expertly and critically situate L2 reading and literacy as a multivariate interactive process and define terms, concepts, and research tools in connection with theory and a rich body of past empirical work with lessons to learn and pitfalls to avoid. They concretely detail how to design empirical studies, collect data, and analyze findings in this important area. Authored by world experts on first language L1 and L2 reading, this book provides a comprehensive, critical, theory-driven review of methods in L2 reading research, offering a step-by-step guide from research design to study execution and data analysis. With useful pedagogical features and a unique database of L2 reading studies from around the world over three decades, this will be an invaluable

Stansfield, 1988 The Development of Second Language Proficiency Ontario Institute for Studies in Education, 1990-03-30 This text presents the findings of a major investigation of second language proficiency in various groups of school aged learners It invites a frank appraisal of the research from an outside panel of experts The theoretical and practical implications of the study are the subject of a lively debate focused on three main research issues the nature of second language proficiency the impact of classroom treatment on second language learning and the role of social and individual factors in bilingual development This original collection of articles will be of interest to all those concerned with policy and practice in second language education *Assessment of Second Language Proficiency Using Curriculum-based Measurement* Kyounghee Seo, 2005 **Resources in Education** , 1992 High-Level Language Proficiency in Second Language and Multilingual Contexts Kenneth Hyltenstam, Inge Bartning, Lars Fant, 2018-06-21 An encompassing picture of what high level competence in second languages and in multilingual use is about *Second Language Acquisition* Doris Luft Baker, Deni Lee Basaraba, Cara Richards-Tutor, Catherine Richards-Tutor, 2018 Although learning English as a second language is ubiquitous across schools worldwide it can be particularly challenging in classrooms with a linguistically diverse

population of students For example although 76% of English learners in the United States speak Spanish as their native language ELs in the United States actually speak more than 450 languages Baker Richards Tutor Gersten Baker Smith 2017 Moreover all ELs even Spanish speaking ELs are a remarkably heterogeneous group in terms of their a English language proficiency b native language proficiency c socioeconomic status d parental level of education e country of origin and f individual and family experiences D rgunoglu Goldenberg 2011 Thus understanding more nuanced ways to support this growing population of students should be a priority Collectively this book provides the most up to date review of our current knowledge about how the complexities of each of the linguistic registers across mathematics science and social studies extends far beyond content area vocabulary and warranting an intentional purposeful focus on language particularly academic English during content area instruction Moreover the current disciplinary content standards demand the integration of discipline specific language instruction within content area instruction To address these demands the topics of the chapters in this book span content areas ELA mathematics science and social studies topical areas assessment language growth instruction and professional development and grade levels preschool elementary and secondary Each chapter provides a synthesis of the research on one of the specific topics and it concludes with implications for practice and research References to the most relevant research are provided We hope that this book can guide future research and professional development initiatives in school districts on what needs to be taken into account when training teachers to be effective instructors of content and academic language English learners constitute a large percentage of the student population outside and inside the United States Thus learning more about language growth patterns in English and the native language assessment considerations effective interventions and curricular analyses can provide a road map to direct the research that can support this increasingly large number of students worldwide
