Capturing Social and Behavioral Domains and Measures in Electronic Health Records Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Recommended Social and Behavioral Domains and Measures for Electronic Health Records, 2015-01-08 Determinants of health like physical activity levels and living conditions have traditionally been the concern of public health and have not been linked closely to clinical practice. However, if standardized social and behavioral data can be incorporated into patient electronic health records (EHRs), those data can provide crucial information about factors that influence health and the effectiveness of treatment. Such information is useful for diagnosis, treatment choices, policy, health care system design, and innovations to improve health outcomes and reduce health care costs.

Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs. This report is the second part of a two-part study. The Phase 1 report identified 17 domains for inclusion in EHRs. This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs. This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material. Standardized use of EHRs that include social and behavioral domains could provide better patient care, improve population health, and enable more informative research. The recommendations of **Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2** will provide valuable information on which to base problem identification, clinical diagnoses, patient treatment outcomes assessment, and population health measurement.

From Predator to Prey Letlhokwa George Mpedi, 2025-10-31 In the stillness of the African bush, leadership reveals itself in its most primal form. Here, where the survival of each species depends on discipline, instinct, coordination, and trust, its lessons arise from the most unexpected sources. For Letlhokwa George Mpedi, a journey through South Africa's Kruger National Park transformed from merely a game drive to a masterclass in leadership. Observing the intricate dynamics of animal behaviour, Letlhokwa began to trace compelling parallels between the natural order and human systems of power. Through this lens, this book explores how nature's codes can inform leadership dynamics. Drawing from a distinctly African approach to leadership, which emphasises community and interdependence, **From Predator to Prey** explores the unwritten rule of law that governs the wild and its applications for humanity. From the silent cooperation of lionesses on a hunt to the matriarchal approach of elephants and even the territorial instincts of wild dogs, this book offers a vivid and thought-provoking perspective on how nature's instincts can inform our understanding of leadership dynamics. As Letlhokwa tracks and interprets the behaviours and strategies of various species, he challenges conventional ideas of leadership based solely on top-down control. Through this observation, he invites a critical rethinking of conventional leadership paradigms. In place of rigid hierarchies, he presents a model that values the very tenets of Ubuntu leadership, as he offers a compelling argument for

leadership rooted in nature's enduring logic Letlhokwa George Mpedi is a Professor of Labour and Social Security Law and the Vice Chancellor and Principal of the University of Johannesburg UJ He completed his B Juris degree 1996 and LLB degree 1998 at Vista University In 2001 the LLM degree in Labour Law was conferred upon him by the then Rand Afrikaans University now UJ and the LLD degree in Mercantile Law was conferred upon him in 2006 by UJ Sexuality Education that Prioritizes Sexual Well-Being: Initiatives and Impact Jacqueline Hendriks, Allison Carter, Jessie Ford, 2025-12-01 All children and young people should receive comprehensive sexuality education from a variety of sources that empowers them to develop a positive self identity and provides them with the tools necessary to form healthy relationships and to manage their own sexuality and sexual health The positive impact such education has for the health and well being of individuals communities and societies has been extensively documented in academic literature Despite the strong evidence base the actual provision of sexuality education can vary markedly across settings and countries and may often focus on biology the prevention of violence diseases or pregnancy and the use of fear based or sex negative messaging Contemporary international guidelines and extensive empirical research strongly encourage strengths based models that are sex positive and empower young people to develop healthy relationships and to learn about pleasure and sexual well being Such programs are often ground in human rights and ethical frameworks In reality specific examples of such programs and guidance about implementation are not easily accessible Research and evaluation data may also be limited or not widely shared The intention of this Research Topic is to showcase a variety of evidence based initiatives that prioritize and celebrate sexual well being through education The impact of such programs shall also be explored alongside broader discussions about implementation sustainability replication and scaling We are keen to spotlight initiatives that address a specific sexuality education topic alongside more extensive programs A variety of age groups preK 16 and educational settings e g home school community online are welcome Critically a key attribute of any showcased initiative is that it seeks to provide education via sex positive approaches that address sexual well being sex positivity and or pleasure This Research Topic welcomes research that includes but is not limited to the following scientifically rigorous evaluations of educational interventions empirical examinations of best practice in educational design meta analyses of educational practice innovation or pedagogies barriers and enablers to program implementation sustainability replication and or scale up cross cultural and or cross national studies study protocols Potential topics of interest include but are not limited to Inclusion of young people in educational design How pleasure discourse is contextualized within sexuality education curricula Human rights Implementation challenges Ethical issues Adolescents views on sex and pleasure education The role of digital technology We especially welcome submissions from young people people from key populations and community based organizations We request that submissions adhere to the principles of respectful and stigma free language *Positive Educational Approaches to Teaching Effectiveness and Student Well-being* Hans Henrik Knoop, Mirna Nel, Sufen Chen, Rebecca Shankland, Llewellyn Ellardus Van Zyl, Matthew
