Scholars in the Marketplace. The Dilemmas of Neo-Liberal Reform at Makerere University, 1989-2005 Mahmood Mamdani, 2007-09-15 Scholars in the Marketplace is a case study of market based reforms at Uganda's Makerere University. With the World Bank heralding neoliberal reform at Makerere as the model for the transformation of higher education in Africa, it has implications for the whole continent. At the global level, the Makerere case exemplifies the fate of public universities in a market oriented and capital friendly era. The Makerere reform began in the 1990s and was based on the premise that higher education is more of a private than a public good. Instead of pitting the public against the private and the state against the market, this book shifts the terms of the debate toward a third alternative than explores different relations between the two. The book distinguishes between privatisation and commercialisation, two processes that drove the Makerere reform. It argues that whereas privatisation, the entry of privately sponsored students is compatible with a public university where priorities are publicly set, commercialisation, financial and administrative autonomy for each faculty to design a market responsive curriculum inevitably leads to a market determination of priorities in a public university. The book warns against commercialisation of public universities as the subversion of public institutions for private purposes. **Community**

College Models Rosalind Latiner Raby, Edward J. Valeau, 2009-03-22 Increasingly, students worldwide are seeking post secondary education to acquire new skill sets and credentials. There is an explosion of community college models that provide educational opportunities and alternative pathways for students who do not fit the traditional higher educational profile. This book focuses on economic models to help local and national economies develop strong workforce training, humanitarian models to bring about social mobility, and peace transformative models to help institutions expand and keep up with societal needs and newly created models that respond to the educational and training needs of a constantly changing world. These models seek to capture the imagination of those who are committed to learning about what works in higher education and, in particular, the impact community college models are having on the changing nature of world social, political, and economic landscapes. With contributors representing 30 countries, this book presents an international perspective. *The Social Background of Makerere [i.e. Makerere] University Students and the Potential for Cost Sharing* Muhammad K. Crisis and Promise in the Caribbean Winston Dookeran, 2016-03-09 The Caribbean is made up of a complex enigmatic region characterised by great disparities in size, population, geography, history, language, religion, race, and politics. This is a region in which harmony and discord work in tandem, trying to link economic logic with political logic. This book is a useful tool not only for those specialists and students of regionalism but for all those putting their hands to the task of nation building and those interested in the development processes of small states and economies. At the same time, this book is a comprehensive historical record, especially highlighting hindrances to development in this region. This study raises two important issues: the political imperative of convergence and the need for appropriate correcting mechanisms that align the

needs of the local with the regional It is a volume that underlines the need for a change in strategy and makes proposals as to how to go about making those changes Uganda Confidential ,2002 **Strategic Marketing of Higher Education in Africa** Emmanuel Mogaji,Felix Maringe,Robert Ebo Hinson,2020-01-20 Strategic Marketing of Higher Education in Africa explores higher education marketing themes along the lines of understanding higher education markets university branding and international marketing strategies digital marketing and student choice making The Higher Education landscape around the world is changing There is global competition for students enrolments universities are competing within their home market as well as in the international market and as government funding for public universities is reducing there is pressure on universities to seek additional income by increasing their student enrolment African universities are not an exception in this competitive market This book is unique in providing a composite overview of strategic marketing and brand communications of higher education institutions in Africa It recognises that there is a growing need for universities to understand the stakeholders and develop strategies on how best to engage with them effectively Highlighting the unique characteristics nature and challenges of African universities this book explores the marketisation strategies of African universities with focus on the strategic digital marketing and brand management The book provides significant theoretical and marketing practice implications for academics higher education administrators and practitioners on how best to market higher education in Africa and reach out to prospective students International practitioners aiming to market to Africans and start a partnership with an African university will also find this relevant in understanding the dynamics of the African market
