Photograph the Face ,2014-06-10 The most essential factor in creating a successful salable portrait is properly lighting the face But

every face is different and each face type requires a different style of lighting. It is imperative that the photographer realizes this. From the subject's complexion and facial size to their clothing, hair color, and setting, there are many aspects to consider when lighting a client. The photographer must also take into consideration what type of product the client wants: senior portrait, bridal portrait, glamour, or professional. Each one of these requires something different. Properly and efficiently addressing all of these factors will set you and your business apart from the competition. In this book, Smith focuses on teaching photographers how to conceptualize and produce portraits that will please the client. He emphasizes that he is not creating his own artistic vision but that he is crafting what the client wants. That is not to say the results aren't artful and creative. Both of those things are very important as Smith shows, but the main goal as a successful professional photographer is to create portraits that the subject wants to buy. Smith advises photographers to be aware of a subject's self-image when creating the portrait, being sure not to light them in a manner that is unflattering or distorted. Success in creating salable portraits relies as much on understanding people and the way our self-image functions as it does understanding the proper techniques of lighting. First, Smith discusses the differences between face types and what to be aware of when setting up the lighting for each. Proper metering and placement of light source are essential to controlling your highlights, your shadowing, and the transition area in between. Establishing a system for modifying your lighting setup for each subject is emphasized. The concept of Camera Sight or visualizing the finished photo ahead of time to look for potential problem areas is very important. As Smith admits, this skill comes with experience. Where he once had to take many test shots to pick out these issues, he is now able to see them before he shoots a single frame. This is a skill that develops over time with training and practice. The author then explains the differences between shooting in a studio and shooting on location, both indoors and outdoors. Different equipment is required for each scenario, but the equipment used for shooting outdoors can even differ depending on the time of day. While the most ideal natural light occurs just after sunrise or just before sunset, most customers do not want to have their portraits taken at 5am or late in the day. So the photographer needs to be prepared to shoot in the harsh midday sun. In addition to lighting the face, the photographer must find usable light to illuminate the background properly. Smith details the lighting system he uses for outdoor portraiture and presents it in the context of his shooting experiences. While studio shoots provide greater levels of comfort and consistency compared to a location shoot, there are still many things required to get that perfect shot. Properly applying fill, accent light, and shadowing are just as important in the studio as they are on location. Understanding the concepts of traditional lighting allows the photographer to consistently create studio portraits that will please any customer. The most important part of the face to light properly is the eyes. Smith explains in detail what factors a successful photographer must consider to get the final portrait every client wants. Whether it is a difference in the size of the client's eyes or ears, asymmetrical lips, or a crooked nose, there are ways to light these to correct the differences. Using artistry and creative vision to adapt from the comfort of studio shoots to the complicated and

diverse demands of location shoots Smith provides the reader with the tools to capture what the client wants every time

500 Poses for Photographing Full-Length Portraits Michelle Perkins, 2015-06-22 It's the portrait photographer's job to create a flattering perhaps idealized likeness of the subject in front of his or her lens. There are countless things to consider both technically and artistically in order to make that happen. One thing is for certain: The more you show in the portrait, the more of the body that you will need to carefully position and refine. Nowhere is this more true than when photographing a full-length subject. Every part of the body from the hair to the tips of the toes must be posed, clothed, lighted, and shaded in order to look its best. The truth is, most photographers have trouble with conceptualizing and carrying out their client's full-length poses. They have their clients strike a pose and try to envision how to make it look natural, comfortable, and photogenic. Unfortunately, their attempts often result in a stiff, unflattering, flat, or just plain awkward presentation. This visual sourcebook features a wide range of full-length poses designed for men, women, teens, kids, and groups in the studio and on location. Photographers will find examples of poses for subjects of all ages that work perfectly for any portrait style, from reserved to edgy and fashion forward, in seated, standing, and reclining presentations. Featuring studio and location, indoor and outdoor portraits from twenty heralded portrait pros, this book will allow photographers to find a pose to re-create with their client, and adventurous shooters can use a sample portrait as a springboard for a new pose they conceptualize to suit their unique client or one of a kind portrait concept. Complete with text on posing basics, this book is an indispensable resource that you'll turn to over and over again.

The Portrait Photographers Posing Guide Nigel Holmes, 2006-11-10 The classic Posing Guide. Rules for posing people for portraits. Drawn in cartoons, making it easy to follow. Serious, invaluable advice on how to pose people in photographs. Amateur Photographer. [Foundations of Posing](#), 2015-10-13 With tips for posing the young and old, males and females, singles, couples, and groups in both indoor and outdoor locations and in reclining, seated, and standing poses from full-length to close-up, this book will walk you through all aspects of posing and balance with examples and easy-to-follow instructions.

Corrective Lighting, Posing & Retouching for Digital Portrait Photographers Jeff Smith, 2010-04-29 With techniques for achieving a flawless portrait, this manual shows how to create stunning professional images in any setting. Tips on how to delicately discuss and evaluate a subject's appearance and his or her specific concerns combine with examples on how subtle changes in lighting and posing can flatter subjects by slimming the waist and hips, enhancing the bust, narrowing the nose, reducing a double chin, and concealing baldness, helping portrait photographers sensitively downplay perceived flaws. Also illustrating how the latest in digital imaging technology can fix problems, this up-to-date resource shows how to digitally eliminate acne, whiten teeth, remove braces, and fix unnoticed clothing problems. Techniques for processing RAW files and for optimizing JPEG files for quick but consistent shooting are also included. With hundreds of new images before and after sequences and informative text, this is the ultimate reference for creating beautiful, flattering portraits.
