

## Key Issue 1: Where Are Migrants Distributed?

Pages 78-83

\*\*\*Always keep your key term packet out whenever you take notes from Rubenstein. As the terms come up in the text, think through the significance of the term.

1. Define **immigration**: migration **TO** a location (coming)
2. Define **emigration**: migration **FROM** a location (leaving)
3. Using **figure 3-1**, briefly state what one would expect to occur, in terms of migration, in each stage of the demographic transition model, as it is applied to a migration transition.

MIGRATION TRANSITION As Applied to the Demographic Transition Model		
Stage 1	Stage 2	Stage 3 & 4
High daily or seasonal mobility in search of food	High international emigration and interregional migration from rural to urban areas	High international immigration and intraregional migration from cities to suburbs

4. What are Ravenstein's **two** laws for distance in relation of migrants?
  - Most migrants relocate a short distance and remain within the same country
  - Long-distance migrants to other countries head for major centers of economic activity
5. Migration may be classified as either **international** or **internal**. What is the difference?

**International migration** is a permanent move from one country to another.

**Internal migration** is a permanent move within the same country.

6. What types of **push factors** are usually responsible for **voluntary migration**?  
**Little job opportunities, family issues, or for economic improvement.**
