Bujosa Vadell, 2024-10-21 This volume examines how innovation and digital transformation impact the financial and accounting sectors Featuring selected contributions from the third Finance Accounting and Law in the Digital Age conference 2024 held at the University of Salamanca Spain the contributions of this book explore the development of digital finance and the complicated equation between financial stability the security of investors and financial consumers sustainable finance and support for innovation Climate change and the exponential growth of technology have built an explosion of financial innovation The digital revolution has recently reached the financial sector protected by a specific regulatory environment The volume describes how all areas of finance are now invested by new players who are transforming the banking and financial landscape to create a novel digital ecosystem      **Working through Surveillance and Technical Communication** Sarah Young, 2023-04-01 What is surveillance and why should we care Why are those who use technology susceptible to being both agents and targets of contemporary surveillance practices Working Through Surveillance and Technical Communication addresses these questions discussing what it means to engage in surveillance examining why this participation may be problematic and offering entry points into assessing one's ethical and socially just involvement with surveillance Further the book suggests ways to resist both individually and collectively and it offers pedagogical entry points for those looking to talk about surveillance with others Led by the central questions How are technical communicators also surveillance workers and Why does this matter for technical communication and surveillance scholarship the text uses the example of Edward Snowden to illustrate how technical communicators and surveillance workers exist on an often overlapping range Sarah Young highlights the potentially discriminatory nature of surveillance and argues that recognizing and evaluating surveillance in is increasingly important in a data driven world Open Access funded by Erasmus University Rotterdam Library in support of open science initiatives It can be found in the SUNY Open Access Repository at a href <https://soar.suny.edu/handle/20500/12648/8546>      *Environmental Management: Issues and Concerns in Developing Countries* Pradip K. Sikdar, 2021-03-17 This book deals with issues and concerns for the human environment in the developing countries incorporating natural processes and systems pollution removal technology energy conservation environmental impact assessment process economics culture political structure and societal equity from a management point of view Solutions to the emerging problems of the environment need a paradigmatic shift in approach from a process based model to a socio political economic model Hence environmental management should involve equality

and control over use of the finite natural resources and the balance between Earth's biocapacity and humanity's ecological footprint. Changes such as green technologies, human population stabilization and adoption of ecologically harmonious lifestyles are absolutely essential and will require redesigning of political institutions, policies and revisiting forgotten skills of sustainable practices of environmental management. These challenges should centre on environment governance using the concepts of common property, equity and security. This book is relevant for academics, professionals, administrators and policy makers who are concerned with various aspects of environment management and governance. **Change Management for Sustainability**

Huong Ha, 2014-06-20. Change management is a challenging and continuous process that requires a particular skill set for both leaders and managers. It is essential for leaders and change agents to understand and address the five most important questions: Why? What? Who? How? When? Inside you'll learn the concept of change management, its impact on the company's business performance and sustainability and the relevant issues associated with it. The author highlights the importance of sustainable development including economic, environmental and social elements and introduces different types of changes including planned, unplanned, incremental, marginal, transitional and transformational ones. Various models of planned and unplanned changes are featured including leaders as change agents, the concept of resistance, reasons, sources and forms of resistance to change, definitions of values, attitudes, personalities and perceptions of individuals and how these determinants affect individuals' behaviors, attitudes and responses toward organizational change. Several organizational examples are provided throughout the book to illustrate how high performance organizations grow their business.

**ECIME 2015-9th European Conference on IS Management and Evaluation**. Dr Elias Pimenidis and Dr Mohammed Odeh, 2015-09-07. The 9th European Conference on Information Management and Evaluation (ECIME) is being hosted this year by the University of the West of England, Bristol, UK, on the 21-22 September 2015.
